Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Library and Information Centre, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-8219) or to the Statistics Canada Regional Reference Centre in:

Halifax (902) 426-5331	Regina (306) 780-5405
Montréal (514) 283-5725	Edmonton (403) 495-3027
Ottawa (613) 951-8116	Calgary (403) 292-6717
Toronto (416) 973-6586	Vancouver (604) 666-3691
Winnipeg (204) 983-4020

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

PREFACE

The *Statistics Canada Catalogue 1997* is the first full catalogue since 1994, although two supplements were released in each of the subsequent years. Following the release of the 1994 edition, a market research study was undertaken to help determine changes necessary to make this a more useful product for our users. The 1997 edition reflects many suggested changes.

First and foremost was the request for a single index and this is the most significant change made. The author index has been eliminated and the title and subject indexes have been combined into one. The subject indexing of this catalogue has changed dramatically due to the development of the Statistics Canada Thesaurus which is now used to index all of Statistics Canada's products and services. One feature that has been carried over from the previous edition of the catalogue is the article level indexing for five of our flagship publications: *Canadian economic observer*, *Canadian social trends*, *Health reports*, *Juristat* and *Perspectives on labour and income*. Indexing for all issues from January 1994 to the end of March 1997 is included in this catalogue.

For a number of years both electronic and print products were included in the catalogue. Due to the large number of products and services that are now being offered by Statistics Canada it became increasingly difficult to list them all, with the necessary indexing, in one volume. Therefore, it was decided, following a review of the market research, to separate the print from the electronic. This current volume is a catalogue of all official print publications as of March 31st, 1997; in those cases where a publication is available in another medium this is indicated. Information on electronic data products and services as well as additional information about our print publications can be found by using Statistics Canada's electronic "Information on Products and Services" (IPS) catalogue. Work is currently underway to develop a CD-ROM version of the IPS and this new product as well as the IPS on the World Wide Web may ultimately become our catalogue of electronic products and services.

There were a number of 1991 Census products initially planned which, ultimately, were never produced but were listed in both the *1994 Statistics Canada Catalogue* and the *1991 Census Catalogue (second edition)*. As a result, it was decided to include a comprehensive listing of all 1991 Census print products actually released in this catalogue although in some cases they are now out-of-print. For 1996 Census products the *1996 Census Preview of Products and Services*, updated to July 1997, has been incorporated in the catalogue. This lists all 1996 Census products, both print and electronic, planned for release. The *1996 Census Catalogue* will be published in early fall 1997. In the meantime, users can have access to detailed information about 1996 Census products through the IPS.

Many of the changes recommended by the market research have been incorporated in this edition of the catalogue. We hope that you will be pleased with the results. With each catalogue changes are made in response to suggestions. In this regard please forward any comments that you might have to:

ACKNOWLEDGEMENTS

This edition of the catalogue was compiled and edited by Myrna Bazinet, Jane McGregor and Freda Taylor Christopher under the direction of Tony Moren. We wish to thank our colleagues Susan Dewar, Fay Hjartarson, Carole L'Heureux and Carole Paradis for their valued assistance and advice. Special thanks are also due to Dissemination Division, Marketing Division and Census Operations Division as well as the many author divisions who contributed to this product.

COMPENDIA

11-002-XPE

Infomat, a weekly review. Weekly. First issue July 1973. English and French editions. ISSN 0380-0547

The weekly review highlights major Statistics Canada reports, reference papers and other releases. It contains charts, a summary of the latest monthly statistics and a complete list of publications released during the week, arranged alphabetically by originating division.

Note: Also available on the Internet at <http://statcan.ca:80/cgi-bin/downpub/downpub.cgi>

11-008-XPE

Canadian social trends. Quarterly. First issue June 1986. English and French editions. ISSN 0831-5698

This publication discusses the social, economic, and demographic changes affecting the lives of Canadians. It contains the latest figures for major social indicators.

Note: Catalogue no. 11-008-XPE contains articles written by Statistics Canada researchers on social situations in Canada. Individual issues released since January 1994 have been indexed, but specific contents have not been listed here because of space constraints.

	Per Issue	Per Year
Canada:	\$11.00	\$36.00
Outside Canada:	US \$11.00	US \$36.00

11-010-XPB

Canadian economic observer. Monthly. First issue January 1988. Bilingual edition. ISSN 0835-9148

This is Statistics Canada's monthly flagship publication for economic statistics. Each issue contains a monthly summary of the economy, major economic events and a feature article. A statistical summary contains a wide range of tables and graphs on the principal economic indicators for Canada, the provinces and the major industrial nations. A historical listing of this same data is contained in the *Canadian economic observer: historical supplement* (catalogue no. 11-210-XPB).

Note: Individual issues released since January 1994 have been indexed, but specific contents have not been listed here because of space constraints.

Statistics Canada catalogue. Annual. First issue 1930. English and French editions. ISSN 0838-4223

This catalogue lists publications available for sale from Statistics Canada. It also includes a combined title/subject index, a list of full depository libraries, the *1996 Census preview of products and services* as well as details for ordering.

	Per Issue
Canada:	\$16.00
Outside Canada:	US \$16.00

11-210-XPB

Canadian economic observer. Historical statistical supplement. Annual. First issue 1988. Bilingual edition. ISSN 0838-0236

This is a companion volume to the monthly report (catalogue no. 11-010-XPB) and contains historical annual series that correspond to those published in the monthly tables. Data covered include the national accounts, prices, international and domestic trade, labour and financial markets. Provincial detail for employment earnings, retail trade, housing and consumer price indexes are also presented.

Canada:	\$28.00
Outside Canada:	US \$28.00

11-402-XPE

Canada year book. Biennial. First issue May 1867. English and French editions. ISSN 0068-8142

The *Canada year book* presents an overview of the social, economic and cultural life of Canada. Complete with 16 chapters, more than 350 tables, charts, graphs and a series of short feature articles, the year book is Canada's most comprehensive reference resource. Illustrated with approximately 90 photographs and written in an accessible and easy-to-understand style, it conveys a clear picture of the trends and issues that dominate contemporary Canadian life.

The *Canada year book* first appeared in 1867, the year Canada was founded. Collectively, it forms a body of living history, which has successfully tracked and monitored the progress and development of Canada since Confederation.

	Per Issue
Canada:	\$54.95
United States:	US \$66.00
Other Countries:	US \$77.00

11-403-XPE

Canada, a portrait. Biennial. Released May 1980. English and French editions.
ISSN 0840-6014

The 1996 edition presents an overview or portrait of the social, economic and cultural life of Canada today. Packaged in a new 27.5 x 22 cm hard cover format, it features six chapters: "The Land", "The People", "The Society", "Arts and Leisure", "The Economy" and "Canada in the World". It includes 45 high-quality colour and black and white photographs. Eminent Canadians - Myriam Bédard, Evelyn Hart, Gerhard Herzberg, Graham Greene, Joe Schlesinger, Julie Payette - have contributed prefaces to each chapter. Additional quotations by and about Canadians and short feature articles complement the main text.

11-509-XPE

Human activity and the environment, 1994. Occasional. Released March 1986. English and French editions.
ISBN 0-660-15439-0

This is the fourth edition of Statistics Canada's popular environmental statistics compendium. This unique compilation brings together data from Statistics Canada and other organizations in a comprehensive look at the Canadian environmental trends and issues. New for 1994 are international and provincial environmental profiles, which allow easy comparison of varying environmental performance. Also new are sections on the economy, energy, soil erosion, air quality, contaminants and many others.

11-526-XPB

Households and the environment, 1994. Occasional. Released 1995. Bilingual edition.
ISBN 0-660-58923-0

In May 1991, Statistics Canada conducted the Household Environment Survey to measure household actions that have,

or are perceived to have, positive or negative impacts on the environment. The survey provides baseline information to use in measuring progress towards sound environmental practices at the household level. The subjects examined include recycling and waste reduction practices, energy and water conservation practices, the use of recycled products, and the use and disposal of potentially hazardous household substances.

11-528-XPE no. 1

Environmental perspectives 1. Occasional. Released March 1993. English and French editions.
ISBN 0-660-14755-6

This publication presents the results of recent studies and surveys on current and emerging environmental issues. The 13 chapters include data on local government waste management, further details from the Household Environment Survey, a study of land-use change around Riding Mountain National Park, an analysis of the impact of estimated compliance costs of the 1992 federal regulations governing Canadian pulp and paper mills and a linking of greenhouse gas emissions to industrial production using an input-output model. Other survey results include land management practices for soil erosion control, packaging use and disposition, pollution abatement and control expenditures and a profile of the Canadian waste management industry. Preliminary estimates of the value of crude oil and gas reserves in Alberta are also presented.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$25.00</i>
<i>United States:</i>	<i>US \$30.00</i>
<i>Other Countries:</i>	<i>US \$35.00</i>

11-528-XPE no. 2

Environmental perspectives 2. Occasional. Released June 1995. English and French editions.
ISBN 0-660-15573-7

This publication presents the results from recent studies and surveys on current and emerging environmental issues. The 10 chapters include information on Statistics Canada's environmental statistics program: information for environmental assessment and analysis; natural resource stock accounts; the quantity and value of Canada's coal reserves; measuring Ontario's timber resource 1953-1991; valuing Ontario's timber resource stock; water use in economic and domestic activity; Canadian carbon dioxide emissions 1981-1990; household waste management in the 90s; environmental protection expenditures in the government sector; and environmental change around Waterton Lakes National Park.

	<i>Per Issue</i>

GENERAL AND REFERENCE

11-528-XPE no. 3

Environmental perspectives 3. Occasional. Released July 1996. English and French editions.
ISBN 0-660-16515-5

Environmental perspectives, Studies and statistics, no. 3 features the results from recent studies and surveys on current and emerging environmental issues. Its ten articles and two appendices cover the following topics: a comparison of business accounting and national accounting from an environmental perspective; environmental protection expenditures including conceptual issues and current practices; private sector investments in pollution abatement and control; environmental aspects of consulting engineering and scientific and technical services; households and the environment in Canada and Australia; measuring Canada's natural wealth; land statistics for Canada; pilot land accounts for New Brunswick; valuation of Canada's agricultural land; a statistical profile of Canada's commercial fishery; selected environment statistics for Canada, Mexico and the United States; and environment and natural resource statistics for Canada, the provinces and the territories.

<i>Other Countries:</i>	US \$49.00

11-612-MPE

General Social Survey analysis series. Occasional. First issue 1987. English and French editions.
ISSN 0836-043X

This series of publications (9) provides a detailed analysis on the various aspects of the General Social Survey (GSS). Main topic areas include social support, health, time use, personal risk, the family and work and education. Each of the reports focuses on one of the first six annual GSS cycles (1985-1991).

Note: See catalogue no. 11-612-MPE, nos. 1-9 for more detailed information. See also 89-544-XPE *As time goes by...time use of Canadians* for information based on the 1992 GSS on Time Use.

11-612-MPE no. 1

Health and social support (General Social Survey analysis series). Occasional. Released 1989. English and French editions.
ISBN 0-660-12654-0

This report presents initial analyses and findings including comparisons with findings from the 1978-1979 Canada Health Survey. Topics examined include: barriers and bridges to improving health status - smoking, alcohol use, physical activity, etc.; current health status - health problems, etc.; and a focused chapter on support networks and social participation of the elderly.

	<i>Per Issue</i>
<i>Canada:</i>	\$30.00
<i>Outside Canada:</i>	US \$32.00

11-612-MPE no. 2

Patterns of criminal victimization in Canada (General Social Survey analysis series). Occasional. Released April 1990. English and French editions.

This publication presents an analysis of the third cycle of the General Social Survey (1988) which focused in part on personal risk of crime victimization. The report includes comparisons with findings from the 1982 Canadian Urban Victimization Survey.

	<i>Per Issue</i>
<i>Canada:</i>	\$38.00
<i>Outside Canada:</i>	US \$46.00

11-612-MPE no. 3

Accidents in Canada (General Social Survey analysis series). Occasional. Released February 1991. English and French editions.
ISBN 0-660-13588-4

Accident statistics are available from a variety of sources: hospital morbidity data, workers' compensation data, workers' accident and injury data, and vital statistics are all potential sources of data relating to accidents in Canada. However, many accidents that occur are not reported by these programs and information can only be obtained directly from accident victims as reported in a general population survey. The data in this report are unique because they complement the existing statistics and they provide insight into the social and demographic characteristics of Canadians who have experienced an accident in the home, at work, during recreation, or on the road during the year preceding the survey. This is the first national survey to focus on such a broad range of accidents and their implications. Many of these incidents are not recorded elsewhere. Consequently, the information is potentially important for policy makers, legislators, academics and persons involved with prevention programs. This report examines the findings of the accident portion of the survey based on an analysis of the released data.

<i>Other Countries:</i>	US \$56.00

11-612-MPE no. 4

Where does time go? (General Social Survey analysis series). Occasional. Released August 1991. English and French editions.
ISBN 0-660-13738-0

The publication presents an account of how Canadians spend their time and is based on data from a survey of nearly 10,000 Canadian adults conducted during the last quarter of 1986. An analysis of the data collected identifies how the total population and various subpopulations (for example, students, employed mothers and the elderly) allocate their time. These data are relevant to such issues as the increased labour force participation of women and the sharing of household tasks and other responsibilities; the amount of time given to volunteer, housework and other unpaid work in relation to paid work; and how much time Canadians spend in activities with family members versus time spent with others or alone.

GENERAL AND REFERENCE

11-612-MPE no. 5

Ups and downs on the ladder of success: social mobility in Canada (General Social Survey analysis series). Occasional. Released December 1991. English and French editions.
ISBN 0-660-13737-2

The publication presents analysis of the General Social Survey (cycle 2) which focused, in part, on the social mobility of Canadians. The analysis was conducted by researchers from the University of British Columbia. The study of social mobility is concerned with the relationship between parents' education and occupations and those of their children, as well as the relationship between a person's first and subsequent jobs. Social mobility has been a topic of academic research in Canada and many other countries, although in Canada a national social mobility survey had not been conducted since 1973. In response to demands for more current data, Statistics Canada added several questions on this subject to its 1986 General Social Survey.

	<i>Per Issue</i>

<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

11-612-MPE no. 6

Quality of work in the service sector (General Social Survey analysis series). Occasional. Released March 1992. English and French editions.
ISBN 0-660-14053-3

A century ago, the service industries accounted for less than one-third (31%) of employment in Canada. By 1951, almost half of all employed Canadians were working in the service industries. Today, over 70% of Canadians are employed in this sector. This publication presents analysis of the 1989 General Social Survey (cycle 4), which focused on work and education.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

11-612-MPE no. 7

Human resource challenges of education, computers and retirement (General Social Survey analysis series). Occasional. Released September 1992. English and French editions.
ISBN 0-660-14216-3

This publication presents analysis of the 1989 General Social Survey (cycle 4), which focused on work and education. Three major themes relevant to the development of Canada's human resources guided the analysis: the changing relationship between work and education, computer literacy and use, and retirement attitudes and behavior.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

11-612-MPE no. 8

Health status of Canadians (General Social Survey analysis series). Occasional. Released April 1994. English and French editions.
ISBN 0-660-15392-0

This publication presents findings from the 1991 General Social Survey on Canadians' Health, analyzing trends in their health status, their use of the health care system, and their lifestyle risk factors. Data are tabulated at the national and provincial levels. A focus of the report is the health status of people aged 65 to 74 and those aged 75 and over.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

11-612-MPE no. 9

Family and friends (General Social Survey analysis series). Occasional. Released August 1994. English and French editions.
ISBN 0-660-15354-8

Canadians face many decisions concerning their relationships with family and friends. One chapter focuses solely on the family structures and dynamics of older Canadians - those aged 45 to 64 and those aged 65 and over. A number of articles based on the General Social Survey data have already been published in *Canadian social trends*, *Perspectives on labour and income*, and other publications. Now this report provides more extensive analyses, including detailed tabulations and some comparisons with the 1984 Family History Survey.

REFERENCE AND WORKING MANUALS

12-001-XPB

Survey methodology. Semi-annual. First issue June 1975. Bilingual edition.
ISSN 0714-0045

The journal publishes articles dealing with various aspects of statistical development relevant to a statistical agency, such as design issues in the context of practical constraints, use of different data sources and collection techniques, total survey error, survey evaluation, research in survey methodology, time series analysis, seasonal adjustment, demographic studies, data integration, estimation and data analysis methods, and general survey systems development. The emphasis is placed on the development and evaluation of specific methodologies as applied to data collection or the data themselves.

GENERAL AND REFERENCE

	<i>Per Issue</i>	<i>Per Year</i>
<i>Canada:</i>	\$24.00	\$47.00
<i>Outside Canada:</i>	US \$24.00	US \$47.00

Historical issues from 1975 (Volume 1) through 1992 (Volume 18) are available at a discount price. Issues from 1993 (Volume 19) onwards are sold at cover price.

12-001-SPB

Index to survey methodology, volumes 1 to 18, (1975-1992). Occasional. Released 1992. Bilingual edition.

This index to over 300 articles that have appeared in *Survey Methodology* since its inception is intended to simplify the task of locating articles of interest to readers. The index is in three parts. Four bibliographies are listed in the bibliographical index and all other articles are classified both in the author index and in the subject index.

Note: Updates for volumes since 1992 are available as inserts. This publication is sent to subscribers of 12-001-XPB.

12-501-XPE

Standard Industrial Classification, 1980. Occasional. Released 1980. English and French editions. ISBN 0-660-10672-8

The 1980 *Standard Industrial Classification* (SIC-E) is a system for classifying establishments according to their primary activity. It is used to facilitate the collection, tabulation, presentation and analysis of production and related data. As a reference manual, the SIC-E provides a classification structure; a classified index, which includes industry definitions and examples to clarify the content of each industry; an alphabetical index; comparison tables between this and the previous SIC; as well as an introduction specifying the concepts and definitions underlying the classification and providing a user's guide to the interpretation of the classification.

	<i>Per Issue</i>

12-565-XPE

Standard Occupational Classification, 1991. Occasional. Released 1993. English and French editions. ISBN 0-660-10673-6

The *Standard Occupational Classification* provides a systematic classification structure to identify and categorize the entire range of occupational activity in Canada. This up-to-date classification is based upon, and easily related to, the *National Occupational Classification*. It consists of 10 broad occupational categories which are subdivided into major groups, minor groups and unit groups. Definitions and occupational titles are provided for each unit group. An alphabetical index of the occupational titles classified to the unit group level is also included.

Canadian Standard Industrial Classification for Companies and Enterprises, 1980. Occasional. Released 1986. English and French editions. ISBN 0-660-11945-5

The *Canadian Standard Industrial Classification for Companies and Enterprises, 1980* (SIC-C) is a system for classifying companies and enterprises according to the activity(ies) in which they are engaged. It is intended to facilitate the collection, tabulation, presentation and analysis of financial statistics and related data. As a reference manual, the SIC-C provides a classification structure; a classified index, which includes the definition of subsegments and examples to clarify the content of each subsegment; an alphabetical index; and comparison tables between this classification and the establishment-based classification (1980 SIC-E).

Standard Geographical Classification. Volume I. The classification. Occasional. Released 1997. Bilingual edition. ISBN 0-660-59269-X

The *Standard Geographical Classification* (SGC) is a system of names and codes representing areas of Canada. It consists of a three-tiered hierarchy - province or territory, census division, and census subdivision. The SGC is used to identify information for particular geographical areas and to tabulate statistics. This volume is designed as a reference and coding manual. The classification volume contains tables of SGC units with their names and codes and an alphabetical index of place names. It also covers related areas based upon the SGC.

GENERAL AND REFERENCE

12-574-RPE

Concordance between the Standard Industrial Classifications of Canada and the United States: errata, 1980 Canadian SIC - 1987 United States SIC. Occasional. Released 1994. English and French editions.

This document contains changes to the *Concordance between the Standard Industrial Classifications of Canada and the United States, 1980 Canadian SIC - 1987 United States SIC* (12-574-XPE) which was released in 1991. These errata are set up in the same format as the Canada-U.S. Concordance with tables that give the 1980 Canadian links to the 1987 U.S. SIC and the inverse in U.S. SIC order with links to the Canadian SIC. These are followed by explanatory notes, which explain the partial relationships shown in the tables, in both Canadian and U.S. SIC order.

Concordance between the Standard Industrial Classifications of Canada and the United States, 1980 Canadian SIC - 1987 United States SIC. Occasional. Released 1991. English and French editions. ISBN 0-660-13746-1

This publication presents a concordance that identifies the differences between the *1980 Canadian Standard Industrial Classification* and the *1987 United States Standard Industrial Classification* and provides a standard for relating establishment-based statistical data for the two countries. The tables show the relationship between the four levels of the two classifications. The explanatory notes describe the assignment of the activities of an industry class when it relates to more than one class of the other classification.

Standard Classification of Goods, 1996: based on the Harmonized Commodity Description and Coding System. Occasional. Released 1997. English and French editions. ISBN 0-660-16814-6

This publication classifies commodities according to an eight-digit structure. It is based upon the international *Harmonized Commodity Description and Coding System* (HS) and separately identifies the classes used to collect statistics for imports, exports, and materials used and goods produced by Canadian manufacturers.

The 1996 edition includes historical information, interpretive notes and links to the 1996 Customs Tariff of Canada. This is a new edition of the classification manual, the first one having been published for the 1988 data year. It was updated by annual supplements consisting of replacement pages. Annual updates for this edition are available only by request.

Note: The *Standard Classification of Goods* is of particular interest to market researchers who need to know the level of detail for which export and shipment data are collected.

Survey sampling: a non-mathematical guide. Irregular. Released 1993. English and French editions. ISBN 0-660-15049-2

The manual is a basic guide on survey sampling for those with little or no formal training in mathematical statistics and it is largely patterned after workshops on survey sampling. It is intended to explain the fundamental concepts and methods of survey sampling by way of examples and illustrations rather than by theory and algebraic expressions. This second edition has been expanded to include a chapter on sampling methods for telephone surveys in light of the growing prominence of these types of surveys in Canada. As well, this edition includes the complete set of problems and possible solutions used in the survey sampling workshops. These problems offer the reader an opportunity to apply the principles and techniques covered in the guide.

GENERAL AND REFERENCE

INCOME, NATIONAL ACCOUNTS

13-001-XPB

National economic and financial accounts, quarterly estimates. Quarterly. First issue 1953. Bilingual edition.
ISSN 1201-6772

This publication presents information about Canada's National Economic and Financial Accounts (NEFA). These accounts portray the evolution of the Canadian economy on a quarterly basis. They record the components of income and expenditure, saving and investment, and borrowing and lending of each of four broad sectors of the economy: (i) persons and unincorporated businesses, (ii) corporate and government business enterprises, (iii) government and (iv) non-residents. Some information is also provided for sub-sectors of the second and third sectors. The sum of the final (non-transfer) income or the final (non-intermediate) expenditure of all domestic sectors equals gross domestic product at market prices, the market value of total production in Canada.

The publication begins with an overview article, reviewing and analyzing economic developments in the most recent quarter. Most issues also contain a second, more technical article explaining national accounts methodology or analyzing a particular aspect of the economy. It also includes a glossary.

Note: This publication presents National Income and Expenditure Accounts on a quarterly basis for approximately four years at a time. The most recent issue contains the most recent revisions. The data will eventually be revised and cumulated in annual terms and published in catalogue no. 13-201-XPB under the same title.

	<i>Per Issue</i>	<i>Per Year</i>
<i>Canada:</i>	\$44.00	\$145.00

Also available on diskette **13-001-XDB**. On day of release the price of the diskette per quarter is \$125.00, and per year \$500.00. After seven days the price per quarter is \$25.00, and per year \$100.00.

13-009-XPB

National tourism indicators, quarterly estimates. Quarterly. First issue June 1996. Bilingual edition.
ISSN 1205-8467

This product, the *National tourism indicators*, was commissioned by the Canadian Tourism Commission to provide quarterly updates for the Tourism Satellite Account. Beginning with the first quarter of 1997, these indicators are based on new and revised benchmarks for 1992 and 1988. The indicators are for the purpose of monitoring supply, demand and employment for tourism in Canada on a timely basis. The quarterly tables are derived using the National Income and Expenditure Accounts (IEA) and various industry and travel surveys. They will be available about three weeks following the release of the quarterly IEA. Tables providing actual data and percentage changes, for seasonally adjusted current and constant price estimates will be included. A short writeup is provided, and additional data are included in the demand tables for non-tourism commodities produced by non-tourism industries and in the employment tables covering direct tourism employment generated by non-tourism industries.

13-201-XPB

National income and expenditure accounts, annual estimates. Annual. First issue 1944. Bilingual edition.
ISSN 1203-6439

This publication provides a comprehensive annual perspective on the Canadian economy. The subject matter is similar to, but much more detailed than that in publication 13-001-XPB. The focus is on Canada's gross domestic product and four major sectors of the economy: households, businesses, governments and non-residents. Industrial and provincial distributions are provided for several aggregates and there is a thorough financial statement for the various levels of government in Canada. The publication includes an article reviewing and analyzing the latest data revisions. The main body of the publication consists of 73 statistical tables, extensively footnoted and cross-referenced, containing annual data for the most recent twelve-year period.

13-207-XPB

Income distributions by size in Canada. Annual. First issue 1971. Bilingual edition.
ISSN 0575-8750

This publication provides estimates of family and individual incomes by size of income, major source of income, region/province, sex and other characteristics. It includes income shares by quintile and incidence, estimated numbers and characteristics of low income families and unattached individuals. Income deficiency, or the extent to which low income family incomes fall short of the low income cut-offs, is included. Incidence and estimated numbers of low income for persons, children and the elderly are also presented. Statistics are derived from the Survey of Consumer Finances, conducted annually since 1972. The report also includes data analysis, definitions, data quality measures, survey questionnaires and a bibliography.

National tourism indicators, historical estimates. Annual. First issue 1996. Bilingual edition. ISSN 1207-3016

This product, the *National tourism indicators*, was commissioned by the Canadian Tourism Commission to provide annual updates for the Tourism Satellite Account. In the 1997 edition, new and revised benchmarks were introduced for 1992 and 1988. The indicators are for the purpose of monitoring supply, demand and employment for tourism in Canada on a timely basis. The annual tables are derived using the National Income and Expenditure Accounts (IEA) and various industry and travel surveys. They will be available about three weeks following the release of the annual IEA. Tables providing actual data and percentage changes, for seasonally adjusted current and constant price estimates are included. In addition, an analytical section provides graphs, and time series of first differences, percentage changes, and seasonal factors for selected indicators. Data will be published from 1987 and the publication will be available on the day of release. New data are included in the demand tables for non-tourism commodities produced by non-tourism industries and in the employment tables covering direct tourism employment generated by non-tourism industries.

Fixed capital flows and stocks, 1961-1994, historical. Occasional. Released 1994. Bilingual edition. ISBN 0-660-58915-X

This historical publication features national series by industry as well as provincial and territorial totals. The series answers questions such as the size of the capital stock (fixed assets) for Canada and the provinces and territories, rates of growth, the productive capacity of individual industrial sectors and the average age of assets. The data, in millions of current and constant 1986 dollars, show how technology is accelerating

GENERAL AND REFERENCE

the obsolescence of assets. A complete description of the methodology is also included. More detailed industrial and provincial series, as well as the annual update, are available on request. Included are data on gross fixed capital formation (investment), end-year gross and net stocks (value of fixed assets), service life, average age, price indexes for capital expenditures on construction and machinery and equipment.

A user guide to the Canadian System of National Accounts. Occasional. Released 1989. English and French editions. ISBN 0-660-13257-5

This publication is a further step in Statistics Canada's initiative to promote the understanding and use of key economic series published by the organization. For the first time, all components of the Canadian System of National Accounts are defined and discussed under one cover. The report covers some principal national accounting tenets and embraces input-output, income and expenditure, financial flows, national balance sheets, balance of payments and the international investment position as well as the key concepts of each component. This publication also devotes a chapter on certain classic issues, and possible extensions and modifications to the System and some more recent concerns about the System of National Accounts. This book is intended for use by those working in the field as a general reference guide, and for outside users as an introduction to the availability and contents of the Canadian System of National Accounts.

13-603-MPE no. 2

The size of the underground economy in Canada (Studies in national accounting). Occasional. Released June 1994. English and French editions. ISBN 0-660-15442-0

The first part of this study defines the underground economy, drawing a distinction between unmeasured and untaxed production. The second and third parts estimate underground transactions that are potentially escaping measurement and those that are already captured in gross domestic product. The study concludes by examining whether the resultant underestimation of gross domestic product also entails an underestimation of its growth rate. Estimates of the underground economy, as an upper limit, for 1992 are: unmeasured underground production, 2.7% of GDP; underground production already measured, 1.5%; illegal production, 1%. Thus, as an upper limit, the total value of production that may have escaped detection by the tax authorities in 1992 is 5.2%.

13-603-MPE no. 3

Households' unpaid work: measurement and valuation (Studies in national accounting). Occasional. Released December 1995. English and French editions. ISBN 0-660-15443-9

Delegates at the United Nations Fourth World Conference on Women in September 1995 and at the World Summit on Social Development in March 1995 called on governments to measure unpaid work in accounts similar to those for gross domestic product. This new study is the fourth Statistics Canada has done on the value of household work since the early 1970s. The agency also hosted a conference on the subject in April 1993.

GENERAL AND REFERENCE

In Households' unpaid work: measurement and valuation, the data have been revised back to 1961, and coverage has been extended to include voluntary work and all persons aged 15 and over. The report outlines Statistics Canada's work on this front, reasons for measurement, and explores the broader context by looking at changes in social and economic factors since 1961. It also looks at contentious issues, highlighting them in summary results and a comparison with other OECD countries.

SYSTEM OF NATIONAL ACCOUNTS, INDUSTRY AND COMMODITY STATISTICS

Publications with a catalogue number prefix 15 contain industry and/or commodity information which has been integrated within the System of National Accounts (SNA). SNA publications which are not industry and/or commodity oriented are published under catalogue prefix 13. SNA industry and commodity groupings may differ from other Statistics Canada official classifications such as the Standard Industrial Classification (SIC). These differences ensure that SNA variables are defined consistently over time and across SNA industry and commodity classifications. In addition, integration of source data within the SNA framework ensures consistency in statistical terms. Nevertheless, SNA industry and commodity definitions are uniquely defined in terms of the other official classification structures.

15-001-XPB

Gross domestic product by industry. Monthly. First issue January 1987. Bilingual edition.
ISSN 0711-852X

The publication contains monthly, quarterly, and annual estimates of gross domestic product for 183 industries, including aggregates and special industry groupings. Estimates are available nationally and seasonally adjusted, in millions of dollars at 1986 prices, for the current year and the previous year. The June issue contains historical data covering the most recent several years. A brief text provides analytical highlights, and charts of four major industry groupings are also present.

Note: Historical estimates of Gross Domestic Product at 1986 prices are available in CANSIM matrices 4670-4674.

System of national accounts: aggregate productivity measures. Annual. First Issue 1985. Bilingual edition.
ISSN 0317-7882

The publication contains labour productivity and experimental multifactor productivity annual estimates for several business-sector industries and aggregates at the Canada level. Measures of labour productivity by industry are complemented by corresponding measures of compensation per person, compensation per person-hour and unit labour cost. Multifactor productivity measures are available for alternative specifications of production activity. At the level of industries, productivity is available for gross output and net-gross output. At the business sector level, it is available in terms of value added. In addition, the publication presents interindustry productivity indexes for several industries and the business sector. Due to the interest in analyzing the competitiveness of Canadian industries, the publication compares the labour productivity and multifactor productivity performance of Canada and the United States based on a similar methodology.

Note: This publication continues the bilingual publication 15-204-XPB. The next issue of 15-204-XPE will be produced in 1998.

GENERAL AND REFERENCE

15-510-XPB

The input-output structure of the Canadian economy, 1961-1981 (revised data). Occasional. Released 1987. Bilingual edition.
ISBN 0-660-53419-3

This publication contains input-output tables for the period 1961 to 1981 which are the results of the latest historical revision of the various accounts which form the Canadian System of National Accounts (CSNA). It also provides the final estimates of Gross Domestic Product at factor cost by industry which establishes the contribution of each industry to the total value of production in the economy. These input-output tables constitute a data bank on the production and distribution activity of all industries in Canada which is integrated to the CSNA through the input-output accounting framework. They show who is producing what (distinguishing roughly 200 industries and 600 commodities); who is buying what (intermediate purchases by producers for the production of other commodities or final purchases by producers for the production of other commodities or final purchases by sector); and how much it costs to produce these in material, labour and capital. The introductory chapters cover the following subjects: the input-output accounting framework, the classification system, some special definitions used in the input-output tables, the sources and methods, the aggregation parameters, gross domestic product, some uses and interpretations of the tables and the input-output models used for impact analysis.

15-514-XPE

The economic benefits of interprovincial trade in Canada. Occasional. Released August 1996. English and French editions.
ISBN 0-660-16525-2

Provincial access to national markets are essential in achieving economies of scale and efficiencies of production that are critical for most industries to be competitive on an international scale in an era of rapid trade globalization. Based on the 1990 Interprovincial Input-Output Accounts, this publication presents an overview of interprovincial and international trade flows that examines provincial trade balances, the relative importance between internal and external trade, commodities most traded as well as interprovincial trade linkages. It provides an analysis of economic activity underlying interprovincial trade in terms of gross domestic product and jobs created by exports; economic dependence on trade and rates of economic returns to trade; and an industrial profile of trade looking at the economic contributions of industries through exports as well as industrial dependence on export markets. The document also presents a trade profile for each province and territory illustrated with summary charts and selected analytical statistical summaries, and contains several statistical tables on interprovincial and international trade flows.

Service industries in the Canadian input-output accounts: current prices, sources of data and methods of estimation.

Irregular. Released 1993. English and French editions.

ISSN 1188-6293

The publication outlines the conceptual and statistical framework of the services sector in the accounts. For the first time, the methodology and data sources used to calculate estimates of services in the current-price input-output accounts are described completely. Specific sources and methods are outlined for determining inputs, outputs and gross domestic product of service industries in the business sector.

SPECIAL STUDIES

18-501-XPE

Developing a longitudinal database on businesses in the Canadian economy: an approach to the study of employment. Occasional. Released 1988. English and French editions.

ISBN 0-660-12669-9

This publication outlines how a database on employment by size of firm was created, discusses its current status and potential, analyses the pitfalls in using it to make assertions about our current knowledge of the role of small business in the dynamics of job creation. The database, created by linking data from survey and administrative sources, is presented in a set of tabulations for 1978 and 1984 and for changes between these two years. The tabulations focus on the labour used by businesses and the data are desegregated by size of business, life status of the business (continuous, newly identified or no longer identified) and country of control. They are tabulated by industry and by province.

FARM INCOME, VALUE AND GENERAL PRODUCTION

21-001-XPB

Farm cash receipts. Quarterly. First issue January 1940. Bilingual edition.
ISSN 1206-5064

This publication contains farm cash receipt estimates for individual crop and livestock receipts and direct program payments. Cumulative quarterly data for the current and previous year are published by province and at the national level. The crops and livestock sub-indexes are also available in the same format. In addition, monthly data for the last two years, and annual data for the preceding 10 years are available at the national level for the ten major sub-indexes. The publication also includes some analysis and explanatory notes on concepts and methods.

Note: The estimates appear in quarterly, cumulative quarterly, monthly and annual format. Because the estimates are continually being revised, it is not possible to subtract previous totals from the most recent total in order to obtain correct value of receipts for a single month.

Agricultural financial statistics. Annual. First issue September 1992. Bilingual edition.
ISSN 1188-7516

Using data compiled for Revenue Canada, taxation returns of unincorporated and incorporated farms, this publication provides a detailed picture of the financial performance of Canadian farms. It offers readers detailed summaries of operating revenues and expenses by province, farm type, and revenue class. The publication also features sources and levels of off-farm income for unincorporated operators and farm families, and to complete the picture, distributional tables of on-farm and off-farm income. All of this data is accompanied by text, including: data highlights, concepts and methods, and a glossary of specialized terms.

21-523-XPE

People in Canadian agriculture. Occasional. Released 1995. English and French editions.
ISBN 0-660-14315-1

Farming in the 1990s is considerably different from what it was at the turn of the century, and so are the people in agriculture. This publication introduces a new concept, the "agricultural population", which looks at farm operators and others with an income from, or occupational attachment to, farming. This report classifies seven types of individuals who are in some way involved in farming. More than 50 pages of analysis and 24 charts and tables complete the picture by looking at characteristics such as income, education, hours of work, household structure and farm type.

21-603-UPE

Agriculture economic statistics. Semi-annual. First issue 1926. English and French editions.
ISSN 0833-6210

This publication presents annual estimates of net farm income, farm cash receipts, farm operating expenses and depreciation charges, the index of farm production, current values of farm capital, farm debt outstanding, the farm product price index, direct program payments, the production account, the balance sheet of the agricultural sector, the cash flow account, and wage rates for hired agricultural labour. Notes on the concepts and methods plus a listing of CANSIM databank numbers are included. Twice each year, updates are released which include new and revised estimates of these indicators (except for the index of farm production which was last estimated for 1985 and except for the production account, balance sheets and cash flow accounts which were last estimated for 1994) and data highlights for the most current year.

FARM CROPS

22-002-XPB

Field crop reporting series. Irregular. First issue October 1920. Bilingual edition.
ISSN 0575-8548

The eight publications in this series are released at strategic points in the crop year detailing farm stocks of grain, crop area, yield and production. Stock reports detail the farm-held stocks at the provincial level and farm-held plus commercial stocks at the Canada level for major Canadian grains. The first area report contains the planting intentions of producers while the June estimates are made after most of the seeding has been completed. Yields and levels of production by province are estimated twice, based on expectations to the end of harvest, while the November estimate is released after the harvest.

22-003SXPB

Fruit and vegetable production. Semi-annual. First issue June 1996. Bilingual edition.
ISSN 0383-008X

This semi-annual publication provides an overview of the Canadian fruit and vegetable production sector. Estimates of the annual commercial production of apples by variety are included. The annual commercial production and value of the major tree fruits and berries and grapes are also available. Annual estimates of the area, production and value of the major commercially grown vegetables are published. For processing vegetables, annual contracted and harvested area, production and value, and acquisitions by processors are available. For the mushroom growing industry, estimates of area, production, sales, investments and labour costs and employment are available once yearly. Statistics on the tobacco growing sector are collected once annually and published two times a year.

Two times a year, estimates of the area, yield and production of potatoes are published. The value of potato production is published once yearly. The first issue of the crop year will appear in June and will present the cultivated areas from the Fruit and Vegetable Area Survey conducted in May. The second will appear in February and include area, production, and value data for the crop year.

Note: Over the course of the growing season, the table of contents reflects both value and production of various fruit and vegetable crops as they are harvested while maintaining a consistent presentation of tree fruits, grapes and berries and apple production statistics.

22-007-XPB

Cereals and oilseeds review. Monthly. First issue May 1978. Bilingual edition.
ISSN 0820-9030

This publication provides current grain marketing data and commentary on the major Canadian grains and their products. Detailed supply-disposition analyses are presented along with exports and imports, cash and futures prices and domestic use data. A monthly situation report provides industry highlights. Each issue is an up-to-date source of information for grain analysts, traders, agri-business and the farm community.

Note: Much of the data published in catalogue no. 22-007-XPB is revised and cumulated in catalogue no. 22-201-XPB, *Grain trade of Canada*. In certain cases, there is a greater level of detail in the disposition of grains in catalogue no. 22-007-XPB.

GENERAL SURVEYS

31-001-XPB

Monthly Survey of Manufacturing. Monthly. First issue February 1947. Bilingual edition. ISSN 0840-8238

This publication provides estimated values of manufacturers' shipments, inventories and orders by month. Data are presented for 22 major groups and selected individual industries at the 3 and 4 digit level of detail, as defined by the 1980 Standard Industrial Classification as well as aggregates for durable, non-durable and total manufacturing. Major group industry data are shown with and without adjustment for seasonal variation. Unadjusted shipment totals by province and by major groups within provinces are also shown. These data are used to monitor the business cycle in the key manufacturing sector of the economy; to evaluate and develop financial and industrial policy; and to provide market data at the detailed industry level. Related information on manufacturers' opinions about employment and production prospects over the next 3 months and on the current state of inventories and orders are available from the Business Conditions Survey (BCS). The survey is carried out at the beginning of January, April, July and October. Responses are available about 5 days after the reference month in Statistics Canada's *The daily* (available at Statistic's Canada Internet site). The BCS balance of opinion data often gives a good guide to the direction of change, at least a month in advance of the corresponding quantitative data.

Note: An initial release normally published in *The daily* is also available in fax format (11F0014XFE).

31-203-XPB

Manufacturing industries of Canada, national and provincial areas. Annual. First issue 1953. Bilingual edition. ISSN 0382-4144

This publication presents a set of principal statistics (number of establishments, production and related workers, cost of fuel and electricity, cost of materials and supplies, value of production, value added, salaries and wages of employees, value of shipments) by industry and industry groups for Canada and the provinces. Also included are tables giving historical data of industries ranked by shipment size and establishment counts by employment size. Tables showing statistics by type of organization and size of establishment have been included since 1977, except for the years 1983, 1987 and 1991. For the year 1987, data were shown under an abbreviated format. As of 1992, primary product specialization and coverage ratios are included. These ratios are measures of the homogeneity and completeness, in terms of defining activities, of Standard Industrial Classification (SIC) industries as collected, compiled and published in the Annual Survey of Manufactures. The ratios are shown at the 4-digit SIC, major group, and all-manufacturing level. Ratios for 1988, 1989 and 1990 have not been published but are available upon request.

Note: 31-203-XPB is a condensed summary of the principal statistics on individual manufacturing industries derived from the Annual Survey of Manufactures. The notes on the historical comparability of data should be consulted when comparing data from more than one year.

MISCELLANEOUS MANUFACTURES

47-007-XPB

Shipments of plastic film and bags manufactured from resin. Quarterly. First issue March 1983. Bilingual edition.
ISSN 0823-0900

The publication shows Canadian manufacturers' shipments of the quantity (kilograms) of plastic film and plastic bags and sacks by their first destination - Canada, export. Low density polyethylene film is broken down under: packaging, construction and agricultural, shrink film and industrial sheeting, and tubing. Other categories are: high density

polyethylene, stretch wrap, co-extrusions and other plastic film. Categories for bags and sacks are: garbage, dry cleaner's, grocery, luncheon, notions and millinery LDPE, notions and millinery HDPE, and other. The December issue includes a list of reporting firms and plant location.

Note: This publication presents shipments of low density plastic film products, such as garbage bags, shipping bags, etc., by area for the current quarter and year-to-date. There are no figures for values of shipments. The data is not repeated in the same detail elsewhere although catalogue no. 31-211-XPB does give an aggregate figure on an annual basis for shipments of plastic film.

TRANSPORTATION - GENERAL

50-002-XPB

Surface and marine transport. Irregular. First issue June 1985. Bilingual edition.
ISSN 0828-2897

This service bulletin presents timely data, time series analysis, and special tabulations covering trucking, rail, bus, urban transit, and marine transportation. Topics include summary information from the quarterly and annual For-Hire Trucking Surveys (commodity origin/destination), the Quarterly and Annual Motor Carrier Freight and Household Goods Movers Survey, marine commodity movements, port activities, marine financial and other related subjects.

AIRTRANSPORT

51-004-XPB

Aviation: service bulletin. Monthly. First issue 1968. Bilingual edition.

ISSN 0843-493X

Each month, this bulletin presents the most up-to-date available information extracted from all of the Aviation Statistics Centre's surveys. Regular features include releases on principal statistics for Canada's major air carriers, airport data, fare basis statistics and traffic data for Canada's most important markets. This service bulletin is a means of releasing preliminary data in a timely manner. The content is relatively constant with the highlights on page one, acting as an index to each issue. The final data are covered in other publications from the Aviation Statistics Centre released later in the year.

51-203-XPB

Air carrier traffic at Canadian airports. Annual. First issue November 1996. Bilingual edition.
ISSN 0701-7928

This publication presents statistics on airline traffic such as the volume of flights, passengers and cargo, at Canadian airports. Data on Canadian and foreign airlines' regional and local scheduled services have been added to complement the data previously published on the major scheduled services and major charter services. The publication presents several summary tables which have been grouped into sections dealing with overall or specialized views of the airline industry. An analysis of the significant changes which have occurred in the survey period will be provided, by type of service.

57-601-UPB

Energy statistics handbook. Monthly. First issue June 1996. English and French editions.
ISBN: 0-660-54870-4

The handbook, a joint publication of Statistics Canada and Natural Resources Canada, provides current monthly and historical annual energy data covering the last 12 years. This is the most comprehensive source of detailed information on the energy field available and a useful tool for those who analyze and follow the availability, production and use of energy in Canada. Data are organized and presented in a logical, easy-to-use manner by energy type. Economic indicators (money market, housing starts, gross domestic product, etc.) are included to enhance understanding of the links between macroeconomic indicators and energy statistics.

Capital expenditures by type of asset. Annual. First issue 1996. Bilingual edition. ISSN 1201-057X

This publication provides detailed capital expenditures by type of asset on both construction and machinery and equipment made by private and public organizations in Canada. For each province and territory and for the 19 divisions of the Canadian economy, it details capital expenditures according to four types of residential construction, 95 types of non-residential construction, and 56 categories of machinery and equipment. Included are data on capital expenditures for major renovation and alteration of construction assets as well as for major retrofit and refurbishing of machinery and equipment assets. Trade and general construction contractors, suppliers of construction materials, and suppliers of machinery and equipment will find these data useful for market analysis.

Note: This publication replaces the discontinued *Construction in Canada* (no. 64-201-XPB) and the uncatalogued *Capital expenditures on machinery and equipment by type of asset*.

Inter-corporate ownership. Biennial. Released 1996. Bilingual edition. ISSN 0575-8823

The directory presents information in an easy-to-read tiered format, showing at a glance the hierarchy of subsidiaries within each enterprise structure. Entries for each corporation provide country of control and percentage of voting rights held. Inclusion of a Standard Industrial Classification (SIC) and province of head office for most Canadian resident corporations allows study on an industrial or geographical level. In addition to the alphabetical index in each directory, indexes by country of control, province of head office, and SIC-C (company basis) are also available. These indexes have been available since 1992. This covers approximately 70,000 legal entities.

Strategies for success: a profile of growing small and medium-sized enterprises (GSMEs) in Canada. Occasional. Released August 1994. English and French editions. ISBN 0-660-15401-3

This revised publication summarizes the results of the 1992 Survey of Small and Medium-sized Businesses in Canada. The special survey profiles a group of firms that grew rapidly in the late 1980s. It focuses on their activities, business strategies and characteristics. The study summarizes the factors that were perceived by small growing firms as important to their growth. It examines strategies in which they feel they outpace their competitors. It investigates the importance attributed to new marketing: technology, input-sourcing, human resources and management strategies. Finally, it profiles training, research and development, and export activities.

61-524-XPE

Successful entrants: creating the capacity for survival and growth. Occasional. Released April 1997. English and French editions. ISBN 0-660-16909-6

This study looks at firms that are typically somewhat older than firms investigated in the bankruptcy study, but younger than firms investigated in the GSME study (catalogue no. 61-523-RPE). The motivation for studying this group of firms

COMMERCE, CONSTRUCTION, FINANCE AND PRICES

is that new firms have an enormous potential to contribute to the economy. However, most new firms die. The first objective of the study, then, is to identify the characteristics of the entrants that survive. A secondary objective is to identify the differences between the entrants that succeeded by the very fact that they survived, and the entrants that not only survived, but achieved strong growth. Together the three studies provide an important addition to our knowledge about problems facing firms at different points in their life-cycle.

61F0058XPE

Financial performance indicators for Canadian business. Volume 1. Medium and large firms (Firms with revenues of \$5 million and over). Annual. First issue March 1996. English and French editions.

This product provides 15 ratios measuring profitability, solvency and operating efficiency for approximately 165 industries at the Canada wide level. The industrial groups are based on the *Standard Industrial Classification for Companies and Enterprises* (SIC-C), catalogue no. 12-570-XPE. The definition in this publication for medium and large sized firms is firms with annual revenue greater than \$5 million. Each industry is further broken down for annual revenue between \$5 million and \$75 million and for annual operating revenue over \$75 million.

The data is at the Canada level only. There is no individual company data in this report. Also, for each industry, a "common sized" balance sheet is provided. This is a balance sheet showing the distribution of assets, liabilities and shareholders' equity by expressing them as a percentage of total assets. The distributions are based on the combined balance sheets of all firms in each industry and revenue size group. This permits the reader to compare his or her own individual firm to the average for the industry. For example, by comparing an individual firm's balance sheet to the appropriate industry's "common" balance sheet, one could readily see whether the individual firm's portion of total assets in inventory is higher or lower than a typical firm, or whether the portion of shareholders' equity is higher or lower than a typical firm.

Financial performance indicators for Canadian business. Volume 2. Small and medium firms (Firms with revenues under \$25 million). Annual. First issue March 1996. English and French editions.

This product provides 15 ratios measuring profitability, solvency and operating efficiency for approximately 240 industries at the Canada level. The industrial groups are based on the *Standard Industrial Classification System, 1980*

(SIC-E), catalogue no. 12-501-XPE. The definition in this publication for small and medium sized firms is firms with annual revenue under \$25 million. Each industry is further broken down for annual revenue from \$50 thousand to \$499 thousand, \$500 thousand to \$4.9 million and \$5 million to \$25 million.

The data is at the Canada level only. There is no individual company data in this report. Also, for each industry, a "common sized" balance sheet is provided. This is a balance sheet showing the distribution of assets, liabilities and shareholders' equity by expressing them as a percentage of total assets. The distributions are based on the combined balance sheets of all firms in each industry and revenue size group. This permits the reader to compare his or her own individual firm to the average for the industry. For example, by comparing an individual firm's balance sheet to the appropriate industry's "common" balance sheet, one could readily see whether the individual firm's portion of total assets in inventory is higher or lower than a typical firm, or whether the portion of shareholders' equity is higher or lower than a typical firm.

61F0060XPE

Financial performance indicators for Canadian business. Volume 3. Small and medium firms, principal financial ratios by detailed industries (4 digit SIC-E). Annual. First issue October 1996. English and French editions.

This product provides information on the financial performance, sales growth and profitability of small and medium sized Canadian businesses. These businesses are grouped into approximately 600 industries, each a single 4 digit SIC-E based on the *Standard Industrial Classification System, 1980*, catalogue no. 12-501-XPE. The definition in this publication for small and medium sized firms is firms with annual revenue less than \$25 million. Each industry is further broken down for annual revenue between \$50 thousand to \$499 thousand, \$500 thousand to \$4.9 million, and \$5 million to \$25 million.

The data is at the Canada level only. There is no individual company data in this report. The five tables in this publication include 3 years of data: 1993, 1994 and 1995. The tables cover: rate of return - pretax profit on assets ratio; pretax profit margin - profit to sales ratio; solvency ratio - liabilities to assets; sales growth rates from 1993 to 1994 and from 1994 to 1995; and the distribution of firms that experienced profits and losses.

62-553-XPB

The Consumer Price Index reference paper: update based on 1992 expenditures. Occasional. Released 1995. Bilingual edition.

ISBN 0-660-58926-5

The *Consumer Price Index reference paper* is published on the occasion of the update of the Canadian Consumer Price Index (CPI), based on 1992 expenditures. In addition to the replacement of the 1986 family expenditure patterns by the 1992 patterns in the CPI basket, the population was expanded and several methodological changes were introduced.

The *Consumer Price Index reference paper* provides an overview of the CPI. It is intended for a varied audience, ranging from users interested in general information to those requiring more technical or theoretical details. As such, it is not limited to the description of changes associated with the incorporation of the 1992 basket alone but presents and explains all the important aspects of the CPI: its concepts, scope, procedures of data collection and computation, uses and interpretation.

Family food expenditure in Canada. Occasional. Released 1994. Bilingual edition.
ISSN 0838-3898

The publication provides results based on a sample of households that responded to the Food Expenditure Survey throughout 1990. This publication presents a series of tables showing the food expenditure patterns of households living in 17 selected metropolitan areas across Canada. It also includes a brief analysis of these patterns. Many tables are included which show average weekly expenditures classified by type of food purchased in stores and meals purchased in restaurants. The tables present expenditure information by a number of different socio-economic characteristics of the households, including income. Some information is included on quantities purchased and on purchases in different types of stores and restaurants.

Family expenditure in Canada. Occasional. Released 1992. Bilingual edition.
ISSN 0838-3715

The 1992 edition summarizes the results from the Survey of Family Expenditures in 1992, which was conducted across the 10 provinces as well as in Whitehorse and Yellowknife. This was the first national survey of family expenditures since 1986. The publication presents a synopsis of differences in expenditure patterns between 1986 and 1992, and between household groups and areas. It provides a comparison of results from all previous national surveys and offers an

interesting menu of comprehensive data tabulations presenting categories of household expenditures for 1992 classified by various household characteristics, such as household income, size and type, and by various geographical areas.

Industry price indexes, 1986 = 100: users' guide. Occasional. Released 1991. Bilingual edition.
ISBN 0-660-54862-3

This publication describes two sets of price indexes, the Industrial Product Price Indexes (IPPI) and the Raw Materials Price Indexes (RMPI), and it covers four topics. The first section describes the different sets of data and how they are organized. The second section provides some help in choosing the most appropriate index for different uses and describes the main characteristics of the statistics. The third section explains how to link together series from different time periods. The final section gives some general information to users. The intention of this text and accompanying tables is to assist users of the statistics in their selection and use of the figures.

Retail trade. Monthly. First issue January 1929. Bilingual edition.
ISSN 0380-6146

The publication presents retail sales, receipts and number of retail locations from retail enterprises that are considered large (4 locations or more and \$5 million per year of sales within a grade group) and other retail establishments. Retail merchant sales totals for current periods and historical estimates, seasonally and not seasonally adjusted, are shown first by 2 digit trade group and then for each individual province/territory. Not seasonally adjusted sales figures for quarterly estimates are shown by trade group within each province/territory. Department store type merchandise sales, not seasonally adjusted, by province/territory for current periods and historical estimates, are also provided. Data analysis, definitions, methodology, data reliability and a bibliography are also included. Each issue contains statistics for the current month, revised statistics from the previous month and year-to-date cumulations. An additional historical table provides final monthly data for the current and previous year on a monthly basis.

Note: Data in 63-005-XPB is not directly comparable to annual retail trade estimates published 63-223-XPB.

New motor vehicle sales. Monthly. First issue January 1932. Bilingual edition.
ISSN 0705-5595

The publication presents sales data (in dollars and units) of new vehicles by type (commercial vehicles, buses and coaches, and passenger cars), by origin of manufacture (North America, Canada, United States and Mexico, and Japan and Other) and by province of sale. Where possible, data may be further divided between the Big 3 (Chrysler, Ford and General Motors combined) and foreign companies. Average price of vehicles sold and market share data are available by the same breakdowns. Seasonally adjusted estimates are available at the national level for sales (in units and in dollars) by type of vehicle. Seasonally adjusted passenger car sales are also available by origin (North America and Overseas). Total annual sales estimates, based on the raw monthly data, are also available. These data are available by the same breakdowns as are available for the unadjusted monthly series. Each issue provides data for the current month plus historical data by month for the previous two years.

Wholesale trade. Monthly. First issue November 1935. Bilingual edition.
ISSN 0380-7894

Each month, this publication provides estimates of percentage changes for sales and inventories and stocks/sales ratios for wholesale merchants (excluding agents and brokers and wholesalers of grain and petroleum products). Data are presented separately for eleven major trade groups of wholesalers for Canada and in aggregate for five regions. The publication contains month-to-month, year-to-year and cumulative trends, a retrospective for the last six months and data analysis. The data is presented on a percentage change basis for the current month over previous month plus current month over the same month one year ago. Each issue contains about six months of data. Prior to reference year 1994, there were only nine groups (food being included with beverage, drug and tobacco products and computers being included with other machinery).

Restaurant, caterer and tavern statistics. Monthly. First issue June 1967. Bilingual edition.
ISSN 0226-2320

This publication presents the monthly estimates of total receipts of restaurants, caterers and taverns both at the Canada and provincial levels. The estimates for restaurants are broken down into three categories - licensed, unlicensed and take-outs. Highlights of the month's estimates are commented upon along with an analysis of the market share of chain groups versus the independent operators. These highlights are accompanied by tables and graphs showing the year-over-year change for the reference month both in dollar and percentage terms. Revised estimates for the previous month along with the accumulated year-to-date estimates are also outlined.

Note: Each edition contains data for the current month plus year-to-date cumulations.

Wholesaling and retailing in Canada. Annual. First issue May 1995. Bilingual edition. ISSN 1201-0588

This publication presents data on revenue and expense items from wholesalers and retailers by trade group and by province. There are 16 retail trade groups and 11 wholesale trade groups. Profiles of the retail trade groups are provided for each individual province/territory and are comprised of: number of locations, total operating revenues, cost of goods sold, gross margin and employee earnings and benefits. At the national level for each retail trade group are the following performance indicators: sales to inventory, cost of goods sold to inventory, gross margin and profit margin. Also provided at the national level are total operating revenues, number of locations for independent and for chain stores, the number of retail businesses by trade and total operating revenue by SIC (4 digit when possible).

The 11 wholesale trade groups, plus grain and petroleum products, are profiled for each individual province/territory giving: number of locations, total operating revenues, cost of goods sold, gross margin and employee earnings and benefits. Performance indicators by trade group at the national level including sales to inventory, cost of goods sold to inventory, gross margin and profit margin are provided. Total operating revenue at the national level by Standard Industrial Classification and by class of customer and trade group are also provided.

Retail Commodity Survey, 1989. Occasional. Released 1991. Bilingual edition. ISBN 0-660-54865-8

The Retail Commodity Survey for 1989, containing broadly based data on the patterns of consumer demand in Canada, is the most comprehensive study completed since 1974. It provides benchmark data on the type of goods Canadians buy, and allows analysis of change in buying habits and retailing patterns. The survey was designed in consultation with members of the retail business community. It reflects more detailed information than is normally available from the accounting records of Canadian retailers. It covers approximately 200 commodity groupings sold by 16 types of retail outlets, in all the provinces and the territories. Although the proportion of expenditures on major retail commodities did not change appreciably between 1974 and 1989, the survey reflects a number of shifts in consumer preferences. For example, food sales represented about the same proportion of retail sales as in 1974, but poultry was a much more significant component of the food basket at the expense of other meat products. Other changes confirmed by the survey are the shifts in buying habits away from general merchandise stores, including department, variety and general stores, towards specialty retailers.

CONSTRUCTION AND HOUSING

64-001-XPB

Building permits. Monthly. First issue May 1996. Bilingual edition. ISSN 0318-8809

This monthly publication provides information about the building construction sectors. In addition to data on the number and value of building permits issued by Canadian municipalities, this publication provides information on the average value of dwellings, the number and value of mobile homes, and permits issued for building renovation. Data are presented at national and provincial levels as well as for census metropolitan areas, large urban centres and economic regions. With the use of graphs, summary tables and a short analysis, the publication describes current activity and trends in the residential and non-residential building construction sectors.

Note: An initial release normally published in *The daily* (available at Statistic's Canada Internet site) is also available in fax format.

Household facilities and equipment. Annual. First issue September 1953. Bilingual edition. ISSN 0318-5273

Sample surveys of household facilities are taken in the spring of each year. This publication presents estimates of heating, water, cooking and bathroom facilities and of appliances like refrigerators, microwave ovens, washing machines and clothes dryers in Canadian homes. It also includes items such as telephones, radios, television sets, automobiles, etc. Recreational equipment, supplementary heating equipment and fuel, and questions on dwelling condition are included on a rotational basis, as are other household items. The report also includes data analysis, definitions, notes on data quality and survey questionnaires.

INTERNATIONAL TRADE

65-001-XPB

Canadian international merchandise trade. Monthly. First issue January 1947. Bilingual edition. ISSN 1198-7391

Included in this publication are highlights, definitions and occasional articles on Canadian trade as well as a series of summary charts and tables showing monthly, quarterly, and annual data on both a customs and balance of payments basis. Data are presented by principal trading area, country, commodity category and province. Price and volume indexes and constant dollar information are also included. This publication presents data via the balance of payments basis and the customs basis. Both are explained in each issue. This publication also acts as the early release mechanism for international trade data. Even though the data is subsequently published in greater detail elsewhere in the 65- series, this publication remains a good overview of Canada's international trade.

65-503-XPB

Canadian international trading patterns. Occasional. Released 1985. Bilingual edition. ISBN 0-660-52869-X

This chartbook reviews Canada's trading relations with its principal partners between 1970 and 1984. Charts illustrate the highlights of this period, such as the declining importance of trade with Europe and the recent shift from trade deficits to surplus in the motor vehicle sector. It also includes a calendar of events that have had a major impact on Canada's trade with other countries.

Note: This publication is filled with graphs and graphics plus news highlights from 1982 to 1984 which affected Canadian foreign trade. Much of the information covered is available in the other publications but not in the same graphic form. This publication would be very suitable for classrooms and public libraries where an overview for the years covered is required.

BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENTS

67-001-XPB

Canada's balance of international payments. Quarterly. First issue 1953. Bilingual edition.
ISSN 0847-074X

This publication presents Canada's transactions with non-residents on a quarterly basis. These transactions are grouped under two main accounts: the current account which includes goods, services, investment income and transfers; and the capital account which includes borrowings and investments abroad (including both Canada's assets and liabilities). The transactions are presented quarterly and annually for the three most recent years with the United States, United Kingdom, the European Union (EU), Japan, other countries of the Organisation for Economic Co-Operation and Development (other OECD) and all other countries.

Each publication includes several pages of data analysis accompanied by graphics, definitions, CANSIM data bank numbers, data quality measures and a list of occasional articles. The first quarter issue includes historical data for the same six geographical areas and further details for some accounts. Statistics are derived from surveys, administrative data and other sources.

67-203-XPB

Canada's international transactions in services. Annual. First issue 1986. Bilingual edition.
ISSN 0840-5859

This comprehensive source on annual international service transactions contains aggregate data from 1969 and detailed data for the most recent years. Major categories are travel, freight and shipping, business services, government transactions and miscellaneous services. Business services are categorized by geographical area (United States, European Union (EU) and all other countries), industry, country of control (Canada, United States, other) and whether or not the service was with foreign affiliated companies.

New with the 1988-1989 issue are estimated breakdowns for over 20 additional countries and country groups. Various issues through 1990-91 contain aggregate or more detailed breakdowns for business services by province. The publication includes several pages of data analysis accompanied by graphics, definitions and data quality measures. Statistics are derived from surveys, administrative data and other sources.

Note: The dollar value of transactions (receipts, payments and balances) is available in each issue dating from 1969. The dollar value of transactions by category, area, country and industry are by single year in each issue.

Labour force update. Quarterly. First issue March 1997. Bilingual edition. ISSN 1206-6400

Labour force update is a quarterly serial intended to provide comprehensive information on current labour market issues. Most of the data come from the monthly Labour Force Survey, furnishing an opportunity to demonstrate the enormous analytical potential of this major Statistics Canada survey. This serial also provides an opportunity to bring together relevant data from a number of other Statistics Canada program areas. It is hoped that this publication will be a useful reference document for students, those in business, academics, policy makers and the general public. There are a number of topics that are scheduled to be covered and updated. They include: youths in the labour market, the hours people work, a wage profile of Canada's employees, and non-standard work.

Methodology of the Canadian Labour Force Survey, 1984-1990. Occasional. Released 1991. Bilingual edition. ISBN 0-660-54217-X

The Canadian Labour Force Survey (LFS) is the source of monthly estimates of employment, self-employment and unemployment. Following each decennial population census, the LFS has undergone a sample redesign to reflect changes in population characteristics and to respond to changes in the information needs to be satisfied by the survey. The redesign program following the 1981 Census culminated with the introduction of a new sample at the beginning of 1985, and had the following three objectives: improve subprovincial labour market data, enhance the LFS as a general vehicle for the conduct of household surveys, and improve the cost-efficiency of the survey design. This report is intended to be a reference source on the methodological and operational aspects of the LFS, covering stratification, sampling, survey operations, weighting, estimation and data quality.

Women in the workplace. Occasional. Released 1993. English and French editions. ISBN 0-660-14722-X

This publication analyzes the rapid increase in the number of working women and documents the many other characteristics of women's work experience that have been slower to change. For example, women still tend to be concentrated in traditionally female occupations. Women continue to earn considerably less than men, irrespective of their educational qualifications. Moreover, even when employed, most women still maintain primary responsibility for household work and family matters. This second edition is a unique source of data and analysis on the role of women in today's labour market and on the issues that confront working women. This report includes over 50 pages of Statistics Canada data, supported by 40 tables and 25 charts - some of it never published before.

Analytic reports. Occasional. First issue 1988. Bilingual edition. ISSN 0835-510X

This series of reports, prepared by division staff, offers both in-depth analyses and statistical tables on various labour

market topics. Survey descriptions and definitions of concepts and terms used are provided, where appropriate.

71-535-MPB no. 6

Work arrangements (Analytic reports). Occasional. Released 1993. Bilingual edition. ISBN 0-660-54894-1

The publication presents detailed information on hourly, daily and weekly work schedules, flexible work arrangements, home-based work, temporary work, multiple jobholding and paid overtime. Tables are easy to read and contain data for paid workers aged 15 to 64 classified by age group, sex, family status, industry, occupation, full-time, part-time and work schedule.

71-535-MPB no. 7

Work absence rates, 1977 to 1994 (Analytic reports). Occasional. Released April 1995. Bilingual edition. ISBN 0-660-58921-4

This publication presents trends in absences from work over an 18 year period. Data are published on incidence of absence (proportion of the work force absent in any given week), inactivity rate (proportion of work hours lost due to absence), and number of days lost per worker in the year. The reasons for absences (illness or disability, and personal or family responsibilities) are provided for each measure. The series of tables cover absence rates by sex for detailed industries, major occupations, and major age groups, as well as total absence rates by province.

Enterprising Canadians: the self-employed in Canada. Occasional. Released 1988. Bilingual edition. ISBN 0-660-53413-4

This publication offers a comprehensive view of self-employment in Canada in 1986. Drawing on data from the Labour Force Survey and the Survey of Consumer Finances, the study provides a wealth of demographic and labour market facts on the self-employed as well as an historical perspective from 1975 to 1986. The report also highlights the dynamic role played by the self-employed in labour market developments in 1986.

EMPLOYMENT, UNEMPLOYMENT AND LABOUR INCOME

71-538-XPE

Flux: two years in the life of the Canadian labour market: findings of the Statistics Canada Labour Market Activity Survey, 1986-87. Occasional. Released 1991. English and French editions.

ISBN 0-660-14192-2

The main object of this report has been to expose to a wider public the extent of the data recorded by the Labour Market Activity Survey. As such, it represents primarily a fact book, concerned with what happened, rather than a detailed analysis of the findings, or an attempt to explain them. The Labour Market Activity Survey tracked the same people over time (in this case a two-year period), and demonstrated just how elastic both the working-age population and the labour market are. It is clear now that when reference is made to the labour force at different times, even within the span of a year, that force represents a different size and mix of working-age Canadians each time. This is not to deny the existence of a substantial fixed core at the centre, but there is tremendous elasticity at the periphery.

EMPLOYMENT AND EARNINGS

72-002-XPB

Employment, earnings and hours. Monthly. First issue December 1922. Bilingual edition.

ISSN 0380-6936

This publication presents a timely picture of employment, earnings and hours which is vital to Canada's businesses and governments for planning and decision-making purposes. The tabulations focus on monthly labour market information and historical data series. The major economic variables for over 280 industries are provided at the national and provincial/territorial level. The publication also includes a succinct monthly highlights section, feature articles and notes on the concepts and methodology of the survey.

UNEMPLOYMENT INSURANCE

73-505-XPE

Workers, firms and unemployment insurance. Occasional. Released 1995. English and French editions.

ISBN 0-660-15563-X

Many Canadians have come to frequently rely on unemployment insurance. To some important degree, this reflects the structure of jobs and the human resource decisions of firms. In particular, many employers tend to rely on temporary layoffs as a means of adjusting to periods of depressed sales. How should frequent use of unemployment insurance be interpreted? Does it arise from changes in worker behaviour in response to the availability and generosity of benefits? Or does it reflect broader forces associated with the availability of jobs and the structure of employment relations between workers and firms? Just what role do firms play in determining how the program is used? These are some of the questions addressed in this publication. It also contains a series of data appendices that document unemployment insurance benefits and taxes at a detailed industry level.

EMPLOYEE PENSION PLANS

74-001-XPB

Quarterly estimates of trustee pension funds. Quarterly. First issue January 1973. Bilingual edition.

ISSN 0700-205X

This publication provides estimates for Canada of the income, expenditures and asset portfolios of trustee pension funds. The series began with the first quarter of 1970. It provides advance estimates of the principal statistics of the *Survey of Trustee Pension Funds* (74-201-XPB). It also includes a data analysis.

EMPLOYMENT, UNEMPLOYMENT AND LABOUR INCOME

Note: Each issue of 74-001-XPB contains historical quarterly data for the past three years as well as data for the current year. Special tabulations are available to meet specific needs.

74-201-XPB

Trusted pension funds, financial statistics. Biennial. First issue 1957. Bilingual edition.
ISSN 0835-4634

This publication presents information on the income, expenditure and assets of all trusted pension funds in Canada in both the public and private sectors. Data are presented at the Canada level. The publication contains an analysis of the funds based on the size of the fund, the number of members and the type of benefit. It is a continuation of a series of reports produced since 1957. As a single pool of investment capital in Canada, these funds are surpassed in size only by the aggregate reserves held by the chartered banks.

Note: 74-201-XPB is divided into two sections. The text tables comprise about half of the publication and cover details of pension plans in an historical time series which spans at least ten years. The statistical tables provide detailed operations for the current year. Special tabulations are available to meet specific needs.

Pension plans in Canada. Biennial. First issue 1970. Bilingual edition.
ISSN 0701-5488

This publication provides information on all occupational pension plans sponsored by employers in both the public and private sectors. Information is presented on male and female membership; provincial distribution of members; labour force coverage; eligibility conditions; contribution and benefit rates; retirement ages; contributions paid into the plans; and vesting and indexing provisions. Also included are two special sections on recipients of pension benefits and contributors to RRSPs.

Note: The 1994 issue was replaced by 74-507-XPB.

74-507-XPB

Canada's retirement income program: a statistical overview. Occasional. Released 1996. Bilingual edition.
ISBN 0-660-15577-X

This publication provides extensive information on the major retirement income programs: Old Age Security, the Canada and Québec Pension Plans, employer-sponsored registered pension plans, and registered retirement savings plans

(RRSPs). It contains a chapter on each of these programs, outlining the major milestones in their development and providing data covering the period 1983/84 to 1993/94. It also contains an overview chapter that looks at the part these programs play in the income of those 65 years or older and a chapter that describes the characteristics of those who are saving for retirement, either through membership in a registered pension plan or contributions to an RRSP. This publication will be useful for a wide audience: pension professionals (e.g. employee benefit and investment specialists), employers and policy analysts as well as educational institutions whose curricula covers these increasingly important programs.

Note: This publication replaces the January 1, 1994 issue of *Pension plans in Canada* (74-401-XPB).

LABOUR ANALYSIS AND EMPLOYMENT ISSUES

75-001-XPE

Perspectives on labour and income. Quarterly. First issue March 1989. English and French editions.
ISSN 0840-8750

This quarterly publication brings together and analyzes a wide range of labour and income data. Each issue presents approximately six articles covering topics such as youth in the labour market, pensions and retirement, work arrangements, education and training, and trends in the family income, to name a few. Every autumn and every spring, the publication has reviews of recent market trends. The publication also devotes a section to new products, surveys, research projects and conferences. Another section provides a graphical presentation of selected data from a database of more than 50 up-to-date labour and income statistical indicators by province. The winter issue contains an annually updated index of published articles.

Note: Catalogue no. 75-001-XPE contains articles written by Statistics Canada researchers in the subject area. Specific contents have not been listed here because of space constraints.

EMPLOYMENT, UNEMPLOYMENT AND LABOUR INCOME

75-507-XPE

Women in the labour force, 1994 edition. Occasional.
Released October 1994. English and French editions.
ISBN 0-660-15434-X

While the proportion of women in the labour force has increased dramatically, several aspects of women's work experience have been slower to change. For example, while many women are entering occupations in which few women have worked in the past, most employed women are still concentrated in female-dominated occupations; women's earnings remain well below those of their male counterparts; and even when employed, women are still primarily responsible for housework and family care. This report describes these and other trends related to women's participation in the labour force.

The information presented here has been integrated from a variety of Statistics Canada sources to provide an overview of the labour force participation, employment, unemployment, earnings and employment benefits of women. The report also includes sections examining the changes in the educational attainment of women and the impact of these changes on their labour force activity; the relationship between women's work experience and their family responsibilities; and the exposure of women to perceived work-related health hazards. Finally, the report includes lists of historical and legislative milestones central to the evolution of women's participation in the labour force over the last four decades.

EDUCATION

81-003-XPB

Education quarterly review. Quarterly. First issue April 1994. Bilingual edition.
ISSN 1195-2261

This publication provides statistical data and analysis from surveys through a combination of articles and summary statistics. Descriptions of data release and new survey developments are included, as are data and statistical analyses from elementary-secondary, post-secondary, and adult education and training levels. Characteristics examined include enrollment, staff and finance for schools, universities and colleges. Variables include age, gender, citizenship, degrees and diplomas, salary and source of education funding.

81-528-XPB

A statistical portrait of elementary and secondary education in Canada. Biennial. Released 1996. Bilingual edition.
ISBN 0-660-58936-2

Comparable baseline statistics on a provincial/territorial basis continue to be desired by all jurisdictions. This, the third edition of *A statistical portrait of elementary and secondary education in Canada* related to elementary/secondary statistics, responds to this need. In keeping with the format presented in the second edition (July 1992 release containing 1989-90 data), this edition provides updates using 1992-93 data for each of the following major categories: demography of the school-aged population; student participation; student outcomes; educators; finance. In addition, the document provides an overview of the structure of education in Canada, and a description of each province/territory's financial system.

Guide to Statistics Canada information and data sources on adult education and training. Occasional. Released 1997. Bilingual edition.
ISBN 0-660-59252-5

The adult education and training sector is as complex as it is dynamic. In order to describe all its facets, Statistics Canada surveys many different populations. Given the number of data sources and their conceptual and methodological differences, it is sometimes very difficult for researchers and decision makers to obtain required information or data. This guide is a tool that has been developed to assist them. It provides a summary description of all Statistics Canada surveys related to adult education and training. From a selected variable, it allows the identification of surveys that can provide information. It also indicates relevant publications and how to obtain additional information.

HEALTH REPORTS AND PUBLIC HEALTH

82-003-XPB

Health reports. Quarterly. First issue 1989. Bilingual edition.
ISSN 0840-6529

The quarterly combines several previously existing health publications into a single comprehensive and easy-to-read journal-style report. Issued four times a year, this publication incorporates the best and most widely used features found in

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

previous health publications. With concise text, distinctive charts and easy-to-read tables, it contains incisive analysis and key statistics. Each issue features: an up-to-date list of recently released databases and publications; highlights of newly released data; analytical feature articles that support your understanding of statistical information; directions on how to obtain specialized tabulations and custom data services directly from the Health Statistics Division at Statistics Canada. Every edition will present notable statistics and informative feature articles.

82-562-XPE

Canadian classification of diagnostic, therapeutic and surgical procedures. Occasional. Released 1992. English and French editions. ISBN 0-660-11938-2

This classification (CCP) was originally produced by Statistics Canada in 1978 to meet Canadian needs for a procedural classification to be used in conjunction with the World Health Organization's International Classification of Diseases, Ninth Revision (or ICD-9). The CCP, which was published in both English and French, includes a tabular list, divided into 18 chapters of categories and subcategories, and an alphabetical index. Since the initial implementation of the CCP in 1979, all of the errata produced up to that time have been incorporated. With advances in surgical technology, such as the increased use of the endoscopic surgical approach, it has been necessary to produce two additional errata/updates since the reprint, the most recent being in early 1992. Recently a second printing of the French version became necessary. As with the English, all previously issued errata have been incorporated into the second printing and some previously undetected typographical errors have been corrected. In addition, the new and modified rubrics of the 1992 update have been included in the second printing and may be identified by a special diamond symbol.

84-537-XPB

Life tables, Canada and provinces. Occasional. Released 1995. Bilingual edition. ISBN 0-660-54896-8

The present report contains the tables generated on the basis of age-sex-specific mortality rates for Canada and the provinces prevailing in the period 1990-1992. Life tables for the first year of life have been produced separately by sex for Canada as a whole. Detailed life tables by single years of age, for males and females, have been produced for Canada and all the provinces except Prince Edward Island because of the small population and number of deaths. Abridged life tables using five-year groupings have been produced for males, for females and for both sexes combined, for Canada and all the provinces. These tables are available as shelf tables. Because of the small sizes of their populations, life tables were not constructed for Yukon and Northwest Territories. Their population and deaths were included in the calculation of life tables for Canada. This report explains the methods used to produce the 1990-1992 life tables. Data sources and data files that were created during the construction of the life tables will be described more extensively in a user guide to the computer programs that will be available later from the authors of this document.

JUSTICE STATISTICS

85-002-XPE

Juristat. Irregular. First issue October 1991. English and French editions.
ISSN 0715-271X

This series of reports provides detailed statistics and analysis on a variety of topics and issues concerning Canada's justice system. Annual *Juristats* are produced in the following areas: crime statistics, homicide, impaired driving, justice system resources and expenditures, youth court statistics, youth custody and probation and corrections statistics. Additional *Juristats* are also produced each year on current topics of interest to the justice community. This is a unique periodical, of great interest to those who have to plan, establish, administer and evaluate justice programs and projects, or anyone who has an interest in Canada's justice system.

Note: Each issue of this publication covers a different subject, some as preliminary releases of special reports while other issues are a release vehicle for data which will be released later in a regular publication. Individual issues released since January 1994 have been indexed, but specific contents have not been listed here because of space constraints. 85-211-XPB

Adult correctional services in Canada. Annual. First issue 1981. Bilingual edition.
ISSN 0715-2973

This publication provides timely information pertaining to services provided by governmental agencies responsible for adult corrections in each of the provincial, territorial and federal

sectors. While summary descriptive information is included, the main focus of the report is statistical data on caseload characteristics (e.g. number of admissions to correctional facilities, age and sex of offenders, offences for which the offender is admitted to a correctional facility, sentence length, time served, etc.) and resource expenditures relating to both custodial and community supervision services. The data presented in the report cover five fiscal years with each release.

85-222-XPB

Corrections key indicator report for adults and young offenders. Annual. First issue 1996. Bilingual edition.
ISSN 1208-4840

This publication provides timely correctional population data for adults and young offenders. The data are reported by month, for each correctional jurisdiction (province/territory and federal) and by security status for adult offenders in custody. Summary data on supervised probationers are also included. The publication also provides young offender data by province/territory, by custody status, by month, as well as data on young offenders on supervised probation. The data presented in the report cover a five-year monthly time series. Data analysis, definitions, data quality measures and a glossary are also part of this publication. Statistics are derived from an ongoing data tables collection process conducted bi-annually since 1987.

85-538-XPE

Criminal justice processing of sexual assault cases. Occasional. Released 1994. English and French editions.
ISBN 0-660-15559-1

The purpose of this report is to compile recent statistics on the incidence of sexual assault reported to the police across Canada and to provide a descriptive portrait of the criminal justice response to reports of sexual assault. The focus is on police statistics derived from the Uniform Crime Reporting (UCR) survey, and on court statistics from the Sentencing Study. These databases are maintained by the Canadian Centre for Justice Statistics.

Note: This report expands upon the *Juristat* 85-002-XPB, vol. 14 no. 7, *Criminal justice processing of sexual assault cases*.

Canada's culture, heritage and identity: a statistical perspective. Biennial. First issue December 1995. Bilingual edition. ISSN 1203-4533

This publication provides annual information on the nation's cultural fabric. The 107-page statistical compendium replaces eight former publications. It is an invaluable tool for students, teachers, policy-makers and members of the cultural sector, a sector which plays an important social and economic role in Canada.

Basic data on Canadian identity and cultural diversity, culture in homes, government financial support and cultural exports are included. In addition, the publication profiles individual cultural sectors, such as book and periodical publishing, performing arts and music, visual arts, radio and television, and film and video production.

Culture statistics, the economic impact of the arts and culture sector. Occasional. Released 1986. Bilingual edition. ISBN 0-660-52880-0

This study addresses the matter of the economic value of the activities of this sector. Through an input-output model, the contribution of arts and culture to such key economic indicators as domestic output, Gross Domestic Product, and employment is explored. Estimates of direct, indirect, and induced economic impact upon these variables are provided for each of the major arts and culture sectors of written media, film, broadcasting, sound recording, performing arts, heritage institutions and libraries, government programs, and the wholesaling and retailing of arts and culture products. The study focuses on economic impact at the national level for 1981, with annual projections to 1984.

SCIENCE AND TECHNOLOGY

88-001-XPB

Science statistics. Irregular. First issue September 1983. Bilingual edition. ISSN 0706-0793

This publication, which consists of about 12 issues per year, presents a variety of science and technology statistics. Each issue concerns a different topic, for example: research and development expenditures and personnel in business enterprises, science and technology expenditures in the federal government or provincial governments; gross domestic

expenditures on research and development (GERD); provincial GERD; provincial distribution of federal government science and technology activities; and research and development (R&D) expenditures of private non-profit organizations.

Note: This publication is a means of early release of data which is released in greater detail later in the regular publications of the 88- series. Each issue of this irregular publication contains different data and narrative description. Also available on the Internet at <http://statcan.ca:80/cgi-bin/downpub/downpub.cgi>

88-202-XPB

Industrial research and development... intentions. Annual. First issue 1982. Bilingual edition. ISSN 1192-3385

This report summarizes research and development (R&D) activities performed and funded by Canadian business enterprises and industrial research institutes and associations. The data are used, for instance, to plan and evaluate R&D tax incentive programs, to provide indicators of the state of industrial innovation and to complement national aggregates for scientific R&D expenditures and personnel. Among the topics covered are current and capital expenditures on research and development, energy R&D expenditures by area of technology, R&D expenditures as a percentage of company revenues, sources of funds for intramural R&D, personnel engaged in R&D, and foreign payments made and received for technological services. Most historical tables are presented for the latest five years and disaggregated by 46 industrial groupings, size of R&D program, employment size, revenue size, country of control, and by province.

Note: Specific enquiries should be directed to the author division.

88-513-XPB

Innovation in Canadian manufacturing enterprises.

Occasional. Released 1996. Bilingual edition.

ISBN 0-660-58939-7

This publication is based on *Innovation in Canadian manufacturing enterprises* the third of three catalogued publications that examine innovation and advanced technology use by Canadian manufacturing firms. The first two reports (catalogue nos. 88-512XPB and 88-514XPE) investigated the extent to which manufacturing plants have adopted advanced technologies, as well as the benefits and problems associated with their acquisition.

This latest study, *Innovation in Canadian manufacturing enterprises*, explores manufacturing firms' innovative efforts. Innovations include refinements to manufacturing processes, the development of significant new products, or a combination of both. The results are based on the Survey on Innovation and Advanced Technology, which was conducted by Statistics Canada in 1993.

Note: Third in the series *Survey of Innovation and Advanced Technology 1993*.

88-514-XPE

Benefits and problems associated with technology adoption in Canadian manufacturing.

Occasional. Released 1996. English and French editions.

ISBN 0-660-15579-6

The Survey of Innovation and Technology consists of three main parts: the first deals with innovation and its characteristics; the second investigates advanced technology use; and the third covers the problems and benefits that establishments encounter in adopting advanced technology. This report focuses on the third topic, benefits and problems in adopting advanced technology. A future report will discuss the innovation.

Note: Second in the series *Survey of Innovation and Advanced Technology 1993*.

88-515-XPE

Innovation and intellectual property.

Occasional. Released 1997. English and French editions.

ISBN 0-660-16462-0

This study examines the extent to which firms protect their intellectual property using the framework that has been provided by the state. It investigates which forms of protection are used by firms and how effective these rights are perceived to be by firms that make use of them. It finds that firms use a wide and varied set of instruments to protect the intellectual capital that they create while innovating.

SOCIAL ANALYTICAL STUDIES

89-503-XPE

Women in Canada: a statistical report.

Occasional. Released 1995. English and French editions.

ISBN 0-660-15566-4

Statistics Canada has produced an updated and expanded version of the original publication, first released in March 1985. This report analyzes the situation of Canadian women by exploring their demographic and cultural characteristics, living arrangements, income, labour force activity, health and criminal and victimization characteristics. Supported by more than 65 key colour charts and 190 tables, this report presents this wealth of information in a clear and concise form.

Note: The 1995 edition updates and expands the data published in the 1990 edition.

89-508-XPB

Family and friendship ties among Canada's seniors: an introductory report of findings from the General Social Survey.

Occasional. Released 1988. Bilingual edition.

ISBN 0-660-53415-0

This national study looks at the kinds of family and friendship links upon which seniors rely for support. With an analysis of data collected in the 1985 General Social Survey, the publication shows how the network of family and friendship ties which one can expect to have, varies systematically over

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

the course of one's life. The study demonstrates the substantial levels of help given to others by seniors, as well as the help they receive.

89-511-XPE

Youth in Canada (second edition). Occasional. Released 1994. English and French editions. ISBN 0-660-15330-0

For youths, the ages 15 to 19 are a transition period. Most still live at home and a growing percentage are enrolled in academic institutions. At the same time, however, they are beginning to experience problems and characteristics usually associated with adult life. Many, for example, have begun to leave home; others are entering the labour market for the first time. Youths have the highest unemployment rate of any age group in the country. In addition, those who head families or live alone have very low incomes. These characteristics and others - demographic, family status, education, labour force characteristics, income, health, time-use patterns, criminal activity and victimization - are described in this report, which has drawn upon many sources.

Caring communities: proceedings of the Symposium on Social Supports. Occasional. Released 1991. English and French editions. ISBN 0-660-13575-2

This publication is a collection of papers (some including tables and charts) presented by their authors at the 1989 Symposium on Social Supports. Some of the major issues addressed in the publication are: effects of AIDS on social-service workloads, impacts on women's health of having to work outside the home and care for a family, effects of family support upon seniors' usage of services from agencies and firms, ethnic differences in caring for the elderly, and various kinds of help given by the elderly to their families and to voluntary agencies. Also included are commentaries on the studies by senior professionals in fields of social service. The book

contains a total of 15 papers that present research findings or review the state of knowledge in a given field of research.

The changing labour market for postsecondary graduates, 1975-1984. Occasional. Released 1987. Bilingual edition. ISBN 0-660-52896-7

This publication examines the growth in employment for graduates from various disciplines, trends in the supply of graduates and labour market conditions (salary and unemployment rates) for graduates in selected disciplines in 1978 and 1984. It also reviews employment trends in the economy as a whole between 1975 and 1984 and places changes in labour market conditions for graduates within this context. The study is intended to inform the public and contribute to a better understanding of issues by providing systematic quantitative analysis of changing labour market conditions. Major variables in this report include number of graduates by field, employment and salary, and unemployment statistics on graduates by field of study, and employment trends by occupation and industry for Canada and in some cases Canada excluding Quebec. This publication includes 14 tables and 32 charts.

A portrait of seniors in Canada, second edition. Occasional. Released 1997. English and French editions. ISBN 0-660-16492-2

Seniors are one of the fastest growing population groups in Canada. This report depicts the demographic characteristics, living arrangements and family situation, housing, health, education, work patterns and related activities, income and expenditures, and lifestyles of the population aged 65 and over. It also examines some of these issues, where data allow, in terms of different age groups, for example, those aged 85 and over, within the senior population. The report includes approximately 80 tables and 35 charts, supported by text. It presents the most comprehensive statistical picture of the situation of Canada's senior population with data drawn from a wide array of sources including the census, as well as other surveys such as the National Population Health Survey, General Social Survey, and Survey of Consumer Finances.

Canadians in the pre-retirement years: a profile of people aged 55-64. Occasional. Released 1991. English and French editions. ISBN 0-660-13995-2

While much has been written about the elderly in Canada, less is known about those Canadians who are nearing the

age of 65. The report attempts to fill the gap by profiling the population aged 55-64. What emerges is a portrait of a group in transition. On one hand, people in this age range exhibit many characteristics of the working-age population. At the same time, though, several traits associated with advancing age are beginning to emerge. The information in this report has been integrated from a variety of Statistics Canada and other government sources to provide an overview of the demographic characteristics, family status, health, employment, income, housing, and activity patterns of 55-64-year-olds.

89-522-XPE

Lone-parent families in Canada. Occasional. Released 1992. English and French editions. ISBN 0-660-14195-7

The structure of family living in Canada is changing. The past several decades have seen significant increases in common-law unions, the incidence of divorce and remarriage and the number of blended families. As well, the number of people who are living alone has grown substantially. One of the most dramatic changes has been the rise in the number of lone-parent families. Currently, there are nearly one million lone-parent families in Canada, representing one of every five families with children. This report drew upon a variety of Statistics Canada sources to provide an overview of the demographic and family status, employment, income, housing, and activity patterns of lone parents and their families.

89-523-XPE

A portrait of families in Canada. Occasional. Released 1993. English and French editions. ISBN 0-660-15167-7

In the past decade, there have been significant changes in the structure of family living in Canada. The most dramatic include the rise in the number of common-law unions, lone-parent families and married-couple families without children living at home. For example, in 1991, 77% of all families were headed by married couples and 10% were headed by common-law couples. Nearly one million lone-parent families now live in Canada and over 80% are headed by women. This report was drawn from a variety of sources to give an overview of the demographic and family characteristics, employment, income, housing, family violence, and activity patterns of families.

International Conference on the Measurement and Valuation of Unpaid Work: proceedings.

Occasional. Released 1994. English and French editions.
ISBN 0-660-15400-5

This publication is a record of the International Conference on the Measurement and Valuation of Unpaid Work hosted by Statistics Canada and co-sponsored by Status of Women Canada. The main purpose of the conference was to provide Statistics Canada with the experiences and insights of experts from Canada and from around the world, with a view to accelerating its developments in this field. It achieved this goal by providing a forum for the exchange of information on the benefits and problems associated with generating estimates of unpaid work and its value. Participants discussed the potential for developing a new system of accounts parallel to the existing System of National Accounts. They also debated the content of the 1996 Census of Population. Its comprehensive nature was intended to make initial input to the development of international standards or guidelines on the statistical accounting of unpaid work. Perhaps of equal importance for the global development of statistics on unpaid work, the conference was the starting point for the development of an informal international network of practitioners in the field.

Language, tradition, health, lifestyle and social issues.

Occasional. Released 1993. Bilingual edition.
ISBN 0-660-54891-7

The information in this publication was obtained from the 1991 Aboriginal Peoples Survey. Data tables include information for Canada, the provinces and territories, 11 selected census metropolitan areas, and on and off Indian reserves and settlements. Data are tabulated for adults and children by both total Aboriginal population and by specific Aboriginal group.

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

This survey, conducted in the months following the 1991 Census, included persons who identified with at least one Aboriginal group (North American Indian, Métis, Inuit or a specific group such as Cree or Inuvialuit) and/or who reported being registered under the *Indian Act of Canada*. Series 1 (Tables 1.1 - 1.2) are summary tables showing the total population reporting Aboriginal identity for each Aboriginal group, including those persons living on and off Indian reserves and settlements. Series 2 (Tables 2.1 - 2.7) provides a detailed breakdown of the language and traditional activities for each Aboriginal group. Series 3 (Tables 3.1 - 3.7) contains similar data but for children aged 5-14 years. Series 4 (Tables 4.1 - 4.7) contains health, lifestyle and social issues for the adult population for each Aboriginal group. Series 5 (Tables 5.1 - 5.7) shows the health characteristics of children (under 15) for each Aboriginal group.

1-disability, 2-housing (The Aboriginal Peoples Survey 1991). Occasional. Released 1994. Bilingual edition. ISBN 0-660-58900-1

This report on two distinct topics - disability and housing - is the final release from the 1991 Aboriginal Peoples Survey (APS). The information was collected from 625,710 persons who reported in the APS that they identified with an Aboriginal group (i.e., they considered themselves to be North American Indian, Métis or Inuit). Those who identified with an Aboriginal group represented approximately 63% of the total who, in the 1991 Census of Population, reported having Aboriginal origin(s) and/or being registered under the *Indian Act of Canada*.

89-540-XPE

Dimensions of job-family tension. Occasional. Released 1994. English and French editions. ISBN 0-660-15436-6

This report is the first national study to document characteristics of persons who are heavily involved in family care that goes beyond care of their own children. Canada's rapidly aging population means a growing number of workers will have to provide more care to parents, spouses or other close relatives. The study was written by Dr. Leroy Stone with support from authorities on the problems of balancing job and family obligations. Included are chapters by two authorities in the field: Dr. Alfred Khan and Dr. Sheila Kamerman. Dr. Donna Lero, a leading Canadian authority on child care, co-wrote one chapter. The writers drew upon several of Statistics Canada's national surveys and its new total work accounts system.

89-541-XPE

Family violence in Canada: Canada, current national data. Occasional. Released June 1994. English and French editions. ISBN 0-660-15557-5

This publication presents the results of a number of activities and projects undertaken by Statistics Canada to identify the nature and extent of family violence in Canada. It is divided into four chapters: the first chapter presents the prevalence of wife assault and spousal homicide; the second addresses child abuse; the third focuses on the abuse of seniors; and the final chapter reports on criminal justice processing of family violence cases.

Information on these areas is derived from various national studies, including: a national survey on violence against women; a national survey on transition homes; a survey to examine cases of child abuse reported to pediatric hospitals; a descriptive study of legislation and services provided by provincial child welfare systems; and police reported data on cases of family violence and domestic homicides. Tables, graphs and analysis present the nature and extent of family violence according to the results of the various studies. Also included are brief descriptions of the methodology of each of these studies.

89-544-XPE

As time goes by...: time use of Canadians. Occasional. Released 1995. English and French editions.
ISBN 0-660-15572-9

This study provides a detailed analysis of findings based on the 1992 General Social Survey of Time Use. It examines the daily behaviour patterns and inherent time stress of key population groups among Canadians aged 15 and over. Men and women have been grouped into four broad age categories: youths, 15 to 24; baby boomers, 25-44; mid-agers, 45-64; and seniors, 65 and over. Key population cohorts were subsequently created by combining the significant dimensions that make up the various roles that individuals play over the life cycle (e.g., main activity, sex, marital status, child status and for seniors, living arrangements).

Inter-group differences are explored in the average time spent on both paid and unpaid work activities, personal care and the time left for leisure activities. A number of issues are investigated such as equality of work and leisure within the family, the impact of the influx of women into the labour force, the responsibility for care giving of children and elderly parents, and more general concerns related to the aging of the population. As well, inter-group differences in the tensions arising from the effort to balance work and educational responsibilities with personal needs and family obligations are examined. The concluding chapter provides a snapshot of Canadian men and women at work and at play at various stages over the life cycle.

89-545-XPE

Literacy, economy and society: results of the first International Adult Literacy Survey. Occasional. Released 1995. English and French editions.
ISBN 92-64-14655-5

In recent years, adult literacy has come to be seen as crucial to the economic performance of industrialized nations. Literacy is no longer defined merely in terms of a basic threshold of reading ability, mastered by almost all those growing up in developed countries. Rather, literacy is now seen as how adults use written information to function in society. Today, adults need a higher level of literacy to function well: society has become more complex and low-skill jobs are disappearing. Therefore, inadequate levels of literacy among a broad section of the population potentially threaten the strength of economies and the social cohesion of nations.

A large sample of adults (ranging from 1,500 to 8,000 per country) in Europe (Germany, Netherlands, Poland, Sweden, Switzerland) and North America (Canada, United States) were given the same wide-ranging test of their literacy skills during the autumn of 1994. This report presents the results. The data paint the most detailed portrait ever available on the condition of adult literacy and its relationship with a host of background and demographic characteristics of European and North American adults.

Canada's changing retirement patterns: findings from the General Social Survey. Occasional. Released 1996. English and French editions.
ISBN 0-660-15591-5

This publication presents a socio-demographic profile of retirees using 1989 and 1994 General Social Survey data. Variations in retirement age are examined: that taken by retirees and that planned by people currently in the labour force. Also discussed is the return to paid work after initial retirement and the conditions governing this return. The study exposes the financial situation of retirees and analyses retirees' perception of their financial situation at the time of the survey compared to their situation twelve months before retirement.

A profile of the Métis. Occasional. Released 1996. English and French editions.
ISBN 0-660-15599-0

The Métis people are one of Canada's three Aboriginal groups. While the characteristics of North American Indians and Inuit are relatively well documented, little is known about the Métis. Based on the 1991 Aboriginal Peoples Survey, this report provides an overview of the population who identify with the

EDUCATION, HEALTH, CULTURE AND SOCIAL ISSUES

Métis. It analyzes the socio-economic situation of the Métis in terms of their demographic characteristics, family status, culture, education, labour force characteristics, income, housing and health. For purposes of comparison, information is also provided for the non-Aboriginal, North American Indian and Inuit populations.

The Statistics Canada Total Work Accounts System. Occasional. Released 1996. English and French editions. ISBN 0-660-16455-8

This book introduces the Statistics Canada Total Work Accounts System (TWAS). The Total Work Accounts System integrates data concerning the paid and unpaid work done by individuals in order to support analyses in a wide variety of fields of public concern e.g., child care, patterns of use of time in health promotional activities, intergroup differences regarding time spent in acquiring new skills and knowledge, patterns of total work over the life courses of men and women, time use while doing paid work, and unpaid work of economic value done by groups with low levels of participation in paid labour markets.

TWAS is used by extracting special tabulations or series of coefficients in machine-readable media from its micro-level database. TWAS can also be used by applying statistical analysis routines to the records in that database. Many statistical indicators of groups' work activities and of related time pressures can be derived from the database. The book illustrates in-depth use of such indicators in a chapter that deals with aspects of time use by the unemployed. The book also explains the principles that underlie the design of the TWAS, the system's major components, and illustrates a number of its possible uses.

89-550-MPE

National Longitudinal Survey of Children and Youth series. Irregular. First issue 1996. English and French editions. ISSN 1205-6847

The National Longitudinal Survey of Children and Youth (NLSCY) is a long-term research program (started in 1994) that will track a large sample of children over many years, enabling researchers to monitor children's well-being and development. Each publication in this series will present findings and conclusions of studies to be undertaken by several experts on child development.

89-550-MPE no. 1

Growing up in Canada (National Longitudinal Survey of Children and Youth series). Irregular. Released 1996. English and French editions. ISBN 0-660-16470-1

This publication contains several of the first analyses of the National Longitudinal Survey of Children and Youth data. Analyses on topics such as temperament of infants and the influence of environmental factors, the importance of co-occurrence of problems among children with difficulties, mathematics achievement in Canadian elementary schools, and children's aggressive behaviour are included.

Reading the future: a portrait of literacy in Canada. Occasional. Released 1996. English and French editions. ISBN 0-660-16514-7

The International Adult Literacy Survey (IALS) was a seven-country initiative conducted in the fall of 1994. Its goal: to create comparable literacy profiles across national, linguistic and cultural boundaries. The results, published in the report *Literacy, economy and society: results of the first International Adult Literacy Survey* (catalogue no. 89-545-XPE) demonstrated a strong plausible link between literacy and a country's economic potential. This Canadian report expands and extends the analysis of the Canadian data presented in the international report, including additional data on the distribution of literacy by region and language.

POPULATION ESTIMATES, PROJECTIONS AND ANALYSIS

91-002-XPB

Quarterly demographic statistics. Quarterly. First issue August 1987. Bilingual edition.
ISSN 0835-4057

This publication presents quarterly estimates of population for Canada, provinces and territories as well as statistics on the following components of population change: births, deaths, marriages, immigration, emigration, non-permanent residents, returning Canadians and interprovincial migration, the latter by origin and destination. Quarterly estimates of population are provided for a number of years prior to the reference date of the publication, and statistics on the components are given with the reference quarter. This publication also contains highlights of current demographic trends and a brief description of the methods used to generate the statistics.

91-209-XPE

Report on the demographic situation in Canada. Annual. First issue 1983. English and French editions.
ISSN 0715-9293

In Part I of this annual publication, the authors comment on changes in the main phenomena affecting the Canadian population in recent years, such as growth, fertility, mortality, marriage and divorce, international immigration, internal migration, etc. They look mainly at changes in trends and suggest some reasons for the situation in various segments of Canadian society. They also explain the exact meaning and scope of the indicators used.

Part II gives an in-depth analysis of a topic that has recently attracted significant public attention. After *Overview of the principal world migratory flows* (1991), *Two centuries of demographic change* (1992), *Mexico's demographic challenges* (1993), *The Sandwich Generation* (1994), and *Demographic similarities and differences between Ontario and Quebec* (1995), the 1996 edition, entitled *Common-law unions in Canada at the end of the 20th century*, deals with the extent of this phenomenon, the tempo of change, the characteristics of those who choose to form their first union outside the official bonds of marriage, and the social and demographic implications.

91-213-XPB

Annual demographic statistics. Annual. First issue March 1994. Bilingual edition.
ISSN 1195-9762

These estimates are based on the 1991 Census results, and the Agency's estimates of the number of people not counted by the Census. In addition, they now include non-permanent residents. This publication contains the following data: estimates of the number of census families for Canada, the provinces, and territories, by type of family (husband-wife, lone-parent), size of family, age and sex of parents, and age of children as of July 1; postcensal estimates of the population for Canada, the provinces and territories, by age, sex and marital status, as of July 1, as well as statistics by age and sex for deaths, immigration, emigration, interprovincial migration, the non-permanent resident population and returning Canadians; and postcensal estimates of the population for census divisions and census metropolitan areas in Canada, by the regression-nested and component methods. In addition, this publication contains population projections for the coming five years, highlights of the current demographic trends, and statistics for major demographic indicators such as fertility, mortality, nuptiality, and divorce. A brief description of the methods used to produce the estimates is also included. It contains historical annual total population estimates as of July 1, 1971-1991.

Note: For greater convenience to users, this collection of population estimates provides information previously covered by catalogue nos. 91-204-XPB, 91-210-XPB, 91-211-XPB and 91-212-XPB. Also available on the Internet at <http://statcan.ca:80/cgi-bin/downpub/downpub.cgi>

91-520-XPB

Population projections for Canada, provinces and territories, 1993-2016. Occasional. Released 1994. Bilingual edition.
ISBN 0-660-58916-8

The projections are based on the population estimates as of July 1, 1993, adjusted for net census undercoverage. Nonpermanent residents are included with an additional adjustment for returning Canadians. The projections take into account recent and emerging demographic trends in fertility, mortality, and migration (both international and internal). A range of scenarios by age and sex are provided to 2016 for Canada, provinces and territories; and to 2041 for Canada.

Note: An annual update (a five-year projection) of the medium series is provided in catalogue no. 91-213-XPB.

91-527-XPE

Income of immigrants in Canada: a census data analysis. Occasional. Released 1988. English and French editions.
ISBN 0-660-12742-3

Using data from the 1981 Census and other sources, this study provides an overview of how recent immigrants have adjusted and integrated into Canadian society. A quick review of immigration policy over the years is also presented, as well as charts which show how the percentages of immigrants from less traditional sources have increased, while those from traditional sources have declined. The emphasis is on income as a factor of education, country of origin, ability to speak one of the official languages, and number of years spent in Canada.

Note: 91-527-XPE is a special study based on 1981 Census data.

91-530-XPE

Migration between the United States and Canada. Occasional. Released 1990. English and French editions.
ISBN 0-660-13729-1

This publication presents a cross-sectional description of the characteristics of Americans living in Canada in 1981 and of

Canadians living in the United States in 1980. Using 1980 United States and 1981 Canadian census data, this unique study describes and assesses characteristics in five different areas: demographic, social, labour force status, employment (occupation and industry) and income. The joint report exemplifies the long and sustained cooperation between the United States Bureau of the Census and Statistics Canada in the pursuit of research issues of mutual concern.

Note: 91-530-XPE is a co-publishing venture between Statistics Canada and the U.S. Bureau of the Census. The English edition was also released under the American series, *Current Population Reports Series P-23* no. 161. It contains historical information as well as detailed analysis of migration data from the 1980 American and 1981 Canadian Censuses.

91-533-XPE

Population aging and the elderly. Occasional. Released 1993. English and French editions.
ISBN 0-660-14965-6

This report first describes the mechanism of aging in a population. Next it shows how the aging process is affecting Canada, the evolution of the elderly group, and the way demographic factors influence its size and composition. The second part of this report focuses on the condition of the elderly in Canada (family life, income, health, etc.). Much of the data used in this report comes from the 1991 census.

91-536-XPE

Caribbean immigrants: a demo-economic analysis. Occasional. Released 1989. English and French editions. ISBN 0-660-12957-4

Including immigrants from Guyana and Bermuda, the Caribbean population enumerated in the 1981 Census numbered 211,205, of whom the largest groups were the Jamaicans (78,000) and the Haitians (27,000). They were a diverse population in terms of ethnicity, reflecting British, French, Afro-Caribbean and Asian ancestry. The publication compares the characteristics of this population with respect to age, sex, education and ethnic origin; with that of the Canadian population and other immigrants; and measures their economic success.

Revised intercensal population and family estimates, July 1, 1971-1991. Occasional. Released 1994. Bilingual edition. ISBN 0-660-54899-2

These revised estimates are based on results of the censuses, and the Agency's estimates of the number of people not counted by the Census. In addition, they now include non-permanent residents. This publication contains the following data: intercensal estimates of the population for Canada, the provinces and territories, by sex, marital status, and single years of age from 0 to 64, and five-year age groups from 65 to 90 years and over, as of July 1, for the years 1971 to 1991; intercensal estimates of the total population for census divisions and census metropolitan areas according to the 1991 boundaries, and components of population change, as of July 1, for the years 1986 to 1991; and intercensal estimates of census families for Canada, the provinces and territories, by type of family (husband-wife, lone-parent), size of family, sex and age of parents, and age of children, as of July 1, for the years 1986 to 1991. It also includes highlights of the demographic trends, a brief description of the methods used to produce estimates, and definitions of terminology.

Note: For greater convenience to users, this collection of new population estimates provides information previously covered by intercensal estimates publications 91-518-XPB, 91-519-XPB, 91-521-XPB and 91-529-XPB. Estimates included in these publications replace those previously available.

Family over the life course. Occasional. Released 1995. English and French editions. ISBN 0-660-15565-6

Over the course of history, the family has shown a remarkable capacity for adapting itself, even in concept, to the prevailing social and economic conditions. In recent years the family has faced some particularly striking challenges. By combining cross-sectional and life-course methodological approaches. *Family over the life course* shows how an aging population, low fertility, and increasing economic stress have affected the family situation of men and women at different ages. It then indicates how these effects may evolve in the immediate future.

1991 CENSUS OF POPULATION

REFERENCE PRODUCTS

General Reference

The general reference products are designed to make census products and services easier to use by helping users identify their needs and interpret the data.

92-301-XPE

1991 Census dictionary. Census. Released January 1992. English and French editions.
ISBN 0-660-14250-3

The *1991 Census dictionary* provides detailed information on all of the concepts, variables and geographic elements of the 1991 Census. The information provided for each variable includes a definition, a historical summary, the related population, the associated census question number(s), applicable response categories or classifications, and special remarks. The *1991 Census dictionary* also provides a comprehensive subject index. This publication is an essential census reference tool which helps census data users to understand more easily and interpret correctly the census data.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 99-101-XPE.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

92-302-XPE

1991 Census catalogue (second edition). Census. Released June 1993. English and French editions.
ISBN 0-660-14252-X

The second edition of the *1991 Census catalogue* is the first stop when searching for census products and services. The catalogue provides full product descriptions including information on the release date, price, medium, table titles and catalogue numbers. How to order the products is fully explained, and an order form is provided to make it simpler. Also included in the catalogue are descriptions of the various services available to census data users with a complete list of Statistics Canada contacts to serve you better.

Note: For users wanting a machine-readable "catalogue", see the *1991 Census tabulation guide*. For similar data for 1986, refer to 1986 Census catalogue no. 99-103-XPE.

92-305-XPE

1991 Census handbook. Census. Released December 1992. English and French editions.
ISBN 0-660-14254-6

The *1991 Census handbook* provides a non-technical overview of the census. In straightforward text, it presents a brief history of Canadian censuses and describes the data collection and processing activities. It discusses each census question, including a comparison with those questions asked in 1986. The handbook introduces data users to the census variables and geography, and provides an overview of products and services. Data quality, confidentiality and different applications of census data are also discussed. For the first time, the *1991 Census handbook* provides an overview of the census of agriculture.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 99-104-XPE.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

Geographic Reference

This series of geographic reference products describes geographic areas and terms and provides information on historical comparability.

92-310-XPE

Geography guide book. Census. Released September 1993. English and French editions.
ISBN 0-660-14256-2

In easy-to-understand language, the *Geography guide book* situates and explains the applications of most of Statistics Canada's geographic areas and their geographic hierarchies. Five brief case studies show the reader what steps to follow in actual research situations. At the end of the guide book, all geographic terms are defined. A section describing related geographic products and services, as well as how to order them, rounds out the *Guide book*.

92-311-XPE

1991 Census geography: a historical comparison. Census. Released September 1993. English and French editions.
ISBN 0-660-14257-0

This publication will assist the user in understanding the various changes that have occurred to census geographic areas. It defines the geographic concepts covered in the 1991 Census and compares them with the concepts from 1986. This information is provided for standard census areas such as census subdivisions, census tracts and federal electoral districts, and for non-standard geographies such as block-faces and postal codes.

1991 CENSUS

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$20.00</i>
<i>United States:</i>	<i>US \$24.00</i>

Enumeration area reference lists

The information available in this series assists the user in relating enumeration areas to other geographic levels. The enumeration area is the smallest standard geographical unit and serves as the key to building geographic hierarchies. A user is thereby able to situate a particular enumeration area by census tract, census subdivision and federal electoral district. This information is presented by region and by type of geographical unit.

Reference maps

Geographic reference maps allow users to obtain specific census data by locating target areas as accurately as possible. Statistics Canada offers two series of maps: the enumeration area maps, which are printed upon request, and three-colour reference maps, which are available individually or as a set.

92-319-XPB

Census divisions and census subdivisions. Census. Released June 1992. Bilingual edition.
ISBN 0-660-57112-9

The provincial maps show the boundaries for census divisions (areas such as counties and regional districts) and census subdivisions (such as cities, municipalities, towns, villages, settlements, other local municipal entities and townships). Also shown are the boundaries for census metropolitan areas and census agglomerations. Each province is covered by one to four maps, with scales ranging from 1:375,000 to 1:6,000,000. The base map, produced by Natural Resources Canada, includes water bodies, major roads and railroads.

1991 CENSUS

Note: The maps in this series are also available separately for \$5.00 each in Canada, \$16.00 US in the United States and \$7.00 US in the other countries.

	<i>Per Issue</i>
<i>Canada:</i>	\$75.00
<i>United States:</i>	US \$90.00
<i>Other Countries:</i>	US \$105.00

92-320-XPB

Census metropolitan areas, census agglomerations and census tracts. Census. Released October 1992. Bilingual edition.

ISBN 0-660-57113-7

These maps show the boundaries of census subdivisions, census metropolitan area/census agglomeration parts (urbanized core, urban fringe, rural fringe) and, where applicable, census tracts, primary census metropolitan areas and primary census agglomerations. Also shown are rivers, lakes, railroad tracks, provincial boundaries and other significant features. The map scales range from 1:25,000 to 1:2,000,000. The publications in the Census Tract Profile series contain corresponding maps for each tracted census metropolitan area and census agglomeration.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

Technical Reports

The 1991 Census was a large and complex undertaking. While considerable effort was taken to ensure high quality standards throughout all collection and processing operations, the results are subject to a certain degree of error. The technical reports examine the quality of the 1991 Census data.

Technical reports look at definitions, concepts and components of variables, collection and coverage, regional and head office processing, edit and imputation, data evaluation and quality, and historical comparability with data from previous censuses. This series is aimed at moderate and sophisticated users but will be written in a manner which could make it useful to all census data users.

Two additional methodological reports on coverage and on sampling and weighting also provide valuable assistance to the users in assessing the usefulness of the data for their own applications.

DATA PRODUCTS

Population and Dwelling Counts Series

The publications in this series present the final, unrounded counts for all of Canada. The first four publications provide the counts for population and dwellings by type of geographic area as well as the percentage change in population from 1986 to 1991. The land area (in square kilometers) is included in the CMA-CA and CD-CSD population and dwellings publications. The two remaining publications serve as reference tools for locating particular places and identifying their relationship to other geographic units. Data are also available on demand from the Electronic Shelf for enumeration areas, census tracts and other geographic areas.

93-301-XPB

A national overview. Census. Released April 1992. Bilingual edition.
ISBN 0-660-57277-X

This publication presents the 1991 counts for Canada, provinces and territories, as well as for most of the smaller levels of geography. The tables provide an overall picture of national counts, with many census-to-census comparisons.

	<i>Per Issue</i>
Canada:	\$20.00
United States:	US \$24.00
Other Countries:	US \$28.00

93-302-XPB

Federal electoral districts. Census. Released June 1992. Bilingual edition.
ISBN 0-660-57278-8

The information presented in this publication covers all 295 federal electoral districts (FEDs) according to the 1987 Representation Order. Also included is a reference map of Canada (78.8 cm by 27.8 cm) showing the boundaries of FEDs.

1991 CENSUS

	<i>Per Issue</i>
Canada:	\$30.00
United States:	US \$36.00
Other Countries:	US \$42.00

93-303-XPB

Census metropolitan areas and census agglomerations. Census. Released June 1992. Bilingual edition. ISBN 0-660-57279-6

The tables in this publication provide population counts for both census metropolitan areas (CMAs) and census agglomerations (CAs), for 1986 and 1991. National and provincial rankings are also included.

	<i>Per Issue</i>
Canada:	\$30.00
United States:	US \$36.00
Other Countries:	US \$42.00

93-304-XPB

Census divisions and census subdivisions. Census. Released April 1992. Bilingual edition. ISBN 0-660-57115-3

This publication covers two very popular levels of geography: the census division (counties, regional districts and other similar geographic areas) and the census subdivision (cities, municipalities, towns, townships, villages, Indian reserves and other similarly recognized regions). The tables present census subdivisions by census division with corresponding counts, as well as national and provincial rankings. A geographic index is included.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-305-XPB

Urban areas. Census. Released June 1992. Bilingual edition. ISBN 0-660-57116-1

This publication covers areas defined as being urban according to population density and size.

	<i>Per Issue</i>
Canada:	\$35.00
United States:	US \$42.00
Other Countries:	US \$49.00

93-306-XPB

Unincorporated places. Census. Released June 1993. Bilingual edition. ISBN 0-660-57117-X

An unincorporated place is a cluster of dwellings (i.e. settlement) in rural areas lacking legal limits or local government. This publication indicates in which province or territory, census division and census subdivision such places belong. The information presented here covers all of Canada; a similar but more detailed report is available by region in the Place Name List series or in electronic format in the Place Name Master File.

Note: For similar data for 1986, refer to 1986 Census or in electronic format in the Place Name Master File.

	<i>Per Issue</i>
Canada:	\$45.00

<i>Other Countries:</i>	<i>US \$63.00</i>

The Nation Series

The Nation Series is the first released series where basic data are presented on variables collected by the 1991 Census. It displays considerable detail on selected variables (for example, occupation) or alternatively cross-tabulations which illustrate the analytical potential of the data (for example, marital status by age and sex). In addition, some tables include comparisons with data from earlier censuses.

The series provides national coverage. Most tables show provincial and territorial data; selected data for census metropolitan areas are also included in most publications. The availability of these data at subprovincial/census metropolitan area levels is also possible.

The series consists of 24 publications. The first four publications contain basic information on demographic, family, household, dwelling and mother tongue characteristics collected from all households. The remaining publications contain data collected from a 20% sample of households. Most of the publications include characteristics of population covering demographic, social, cultural, labour force and income variables; others include dwelling, household and family characteristics.

93-310-XPB

Age, sex and marital status. Census. Released July 1992. Bilingual edition.
ISBN 0-660-57121-8

This publication presents the age, sex and marital status composition of Canada's population in 1991 and provides fundamental demographic data. The publication consists of six tables which show various cross-classifications for Canada, provinces, territories and census metropolitan areas. Some historical data are also presented.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

93-311-XPB

Dwellings and households. Census. Released July 1992. Bilingual edition.
ISBN 0-660-57122-6

This publication contains basic information, collected on a 100% basis, on dwelling and household characteristics. Coverage is for Canada, provinces, territories and census metropolitan areas.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-104-XPB.

<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

93-312-XPB

Families: number, type and structure. Census. Released July 1992. Bilingual edition.
ISBN 0-660-57123-4

This publication provides statistics on census families, family persons and non-family persons. Data are presented for Canada, provinces and territories, primarily for the 1991 Census, but with some 1986 information included.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

93-313-XPB

Mother tongue. Census. Released September 1992. Bilingual edition.
ISBN 0-660-57124-2

This publication presents data on the population by mother tongue. It includes information by type of response (single or multiple) as well as data by age and sex for selected languages. Two tables present statistics on mother tongue transmission to children; another presents data on families by mother tongue of husband and wife. In general, the tables are presented for Canada, provinces and territories. However, one table gives data for census metropolitan areas.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-102-XPB.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

93-314-XPB

Occupied private dwellings. Census. Released February 1993. Bilingual edition.
ISBN 0-660-57125-0

This publication provides final statistics from the 1991 Census on selected 20% sample characteristics of occupied private dwellings, for Canada, provinces, territories and census metropolitan areas. While the tables in this publication concentrate primarily on dwelling characteristics, selected household variables are also presented and cross-referenced.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-105-XPB.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$40.00</i>
<i>United States:</i>	<i>US \$48.00</i>
<i>Other Countries:</i>	<i>US \$56.00</i>

93-315-XPB

Ethnic origin. Census. Released February 1993. Bilingual edition.
ISBN 0-660-57126-9

This publication presents data on population distribution by ethnic origin. Ethnic groups are shown by single and multiple responses. Data on sex and age are also included.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-109-XPB.

1991 CENSUS

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-316-XPB

Immigration and citizenship. Census. Released December 1992. Bilingual edition.
ISBN 0-660-57127-7

This publication presents data on population distribution by period of immigration, citizenship, age at immigration and immigrant and non-immigrant populations by place of birth. Population distribution of non-permanent residents is included. One table provides a comparison of the 1986 and 1991 place of birth data for the immigrant population.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-113-XPB.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-317-XPB

Home language and mother tongue. Census. Released January 1993. Bilingual edition.
ISBN 0-660-57128-5

This publication presents data on the population by home language and mother tongue. It includes home language information by type of response (single or multiple) as well as data by age and sex for selected languages. A table showing mother tongue by age group and a table on mother tongue by home language are included.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-103-XPB.

Price: This publication is **out of print** and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-318-XPB

Knowledge of languages. Census. Released January 1993. Bilingual edition.
ISBN 0-660-57129-3

This publication presents data on knowledge of languages, both official and non-official. Data by age, sex, mother tongue and home language are included. The first five tables include data on knowledge of official languages, while the last four present data on knowledge of languages (official and non-official).

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-103-XPB.

93-331-XPB

Selected income statistics. Census. Released April 1993. Bilingual edition.
ISBN 0-660-57142-0

This publication provides selected income statistics for individuals, families and households for 1985 and 1990 in constant (1990) dollars. Included are tables presenting 1985 and 1990 total income and employment income size distributions for the population 15 years and over by sex, age, work activity and marital status. Census family and household income size distributions for 1985 and 1990 are provided by family structure, combination of employment income recipients, household type and size. The publication also includes statistics on the incidence of low income among families, unattached individuals and for the population in 1985 and 1990. All tables are shown for Canada, provinces, territories and census metropolitan areas.

Note: For similar data for 1986, refer to 1986 Census catalogue nos. 93-114-XPB, 93-115 XPB, 93-117 XPB, 93-118 XPB, 93-119 XPB.

Price: This publication is *out of print* and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-332-XPB

Employment income by occupation. Census. Released April 1993. Bilingual edition.
ISBN 0-660-57143-9

This publication presents average employment income for 1985 and 1990 in constant (1990) dollars by detailed occupation and work activity for working men and women.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 93-116-XPB.

Area Profile Series

This series gives a statistical overview, or profile, of geographic areas. A wide range of census variables is covered in limited detail. The geographic areas include: census divisions and census subdivisions (CDs and CSDs); census metropolitan areas and census agglomerations (CMAs and CAs); census tracts (CTs) for CMAs and selected census-tracted CAs; federal electoral districts (FEDs); urban and rural areas; enumeration areas; urban forward sortation areas.

It should be noted that profiles for enumeration areas and urban forward sortation areas are not available as publications. For each of these geographic areas, there are two parts: Part A showing variables obtained on a 100% basis and Part B showing variables obtained on a 20% sample basis.

93-335-XPB

Profile of federal electoral districts. Part A. Census. Released October 1992. Bilingual edition.
ISBN 0-660-57144-7

The data content for the federal electoral district profiles is similar to the one for the census division and subdivision profiles.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 94-125-XPB.

	<i>Per Issue</i>
<i>Canada:</i>	<i>\$45.00</i>
<i>United States:</i>	<i>US \$54.00</i>
<i>Other Countries:</i>	<i>US \$63.00</i>

93-336-XPB

Profile of federal electoral districts. Part B. Census. Released August 1993. Bilingual edition.
ISBN 0-660-57145-5

The data content for the federal electoral district profiles is similar to the one for the census division and subdivision profiles.

Note: For similar data for 1986, refer to 1986 Census catalogue no. 94-126-XPB.

Price: This publication is *out of print* and no longer available for sale. It can however be consulted in Regional Reference Centres and depository libraries across Canada.

93-337-XPB

Profile of census metropolitan areas and census agglomerations. Part A. Census. Released October 1992. Bilingual edition.
ISBN 0-660-57146-3

The data content for the census metropolitan area and census agglomeration profiles is similar to the one for the census division and subdivision profiles. Note: The census tract publications also show data profiles for CMAs and selected CAs and their component census subdivisions.

1991 CENSUS

Note: For similar data for 1986, refer to 1986 Census catalogue no. 94-127-XPB.

<i>Other Countries:</i>	US \$77.00

93-339-XPB

Profile of urban and rural areas, Canada, provinces and territories. Part A. Census. Released April 1993. Bilingual edition.
ISBN 0-660-57148-X

The 100% and 20% sample profiles show data within each province for census metropolitan areas (CMAs) as a group, census agglomerations (CAs) as a group, and the areas outside CMAs and CAs as a group. The areas outside CMAs and CAs are shown by population size. Separate profiles are shown for rural farm and rural non-farm areas within CMAs, within CAs, and outside CMAs and CAs. For rural farm areas, the Part A profile (100% data) includes some data from the census of agriculture, such as number and aggregate area of census farms, number with gross sales under \$25,000, number of greenhouse and nursery farms, number of male and female operators, and aggregate value of land and buildings.

	<i>Per Issue</i>
<i>Canada:</i>	\$40.00
<i>United States:</i>	US \$48.00
<i>Other Countries:</i>	US \$56.00

93-340-XPB

Profile of urban and rural areas, Canada, provinces and territories. Part B. Census. Released February 1994. Bilingual edition.
ISBN 0-660-57149-8

The 100% and 20% sample profiles show data within each province for census metropolitan areas (CMAs) as a group, census agglomerations (CAs) as a group, and the areas outside CMAs and CAs as a group. The areas outside CMAs and CAs are shown by population size. Separate profiles are shown for rural farm and rural non-farm areas within CMAs, within CAs, and outside CMAs and CAs. For rural farm areas, the Part A profile (100% data) includes some data from the census of agriculture, such as number and aggregate area of

census farms, number with gross sales under \$25,000, number of greenhouse and nursery farms, number of male and female operators, and aggregate value of land and buildings.

	<i>Per Issue</i>

<i>Other Countries:</i>	US \$77.00

Area Profile Series - Census tracts

A 100% and a 20% sample data profile for each census-tracted centre provides data on component census subdivisions (CSDs) and census tracts for census metropolitan areas (CMAs) and selected census agglomerations (CAs). The data content is similar to the profiles for the census divisions and subdivisions. Individual publications are available for the 11 largest CMAs, and the remaining 28 census-tracted centres are shown in a series of publications grouped by province.

Dimensions Series

The Dimensions Series present statistical information on themes of considerable public interest. Data presentation varies from basic summary statistics to detailed breakdowns and cross-tabulations. Geographic levels are shown for Canada, provinces, territories and other geographic levels.

Each volume in the series features highlights of the important trends and findings. The availability of these data at subprovincial/census metropolitan area levels is also possible.

94-319-XPB

Language retention and transfer, 1991. Census. Released November 1993. Bilingual edition. ISBN 0-660-57168-4

This publication provides data on the language spoken most often at home for different language groups defined on the

basis of mother tongue. In addition, one table presents data on knowledge of official languages, and another one shows the ability to speak the mother tongue for all languages which are available from the 1991 Census database.

Aboriginal Peoples Products

A series of publications will focus on persons who reported, during the 1991 Census, that they were registered under the Indian Act of Canada or who reported at least one Aboriginal origin such as North American Indian, Métis or Inuit. The following publications cover a wide range of census variables for each Aboriginal group and for the non-Aboriginal population. Please note that, in the first quarter of 1992, consultations were undertaken to determine detailed requirements for this series, as well as for other complementary products.

94-325-XPB

Profile of Canada's Aboriginal population. Census. Released February 1995. Bilingual edition. ISBN 0-660-57172-2

This publication presents a statistical overview of each Aboriginal group in comparison with the non-Aboriginal population. A wide range of demographic and socio-economic variables is displayed by individual entries and grouped under six main headings.

This publication also provides a profile of demographic and socio-economic characteristics for the population with Aboriginal origins and/or Indian Registration, for Canada, provinces and territories. It is based on 20% sample data collected by the 1991 Census of Canada.

96-312-XPE

Profile of Canada's seniors. Census. Released 1994. Bilingual edition.
ISBN: 0-13-150855-5

Who are Canada's senior citizens? This report provides comprehensive information on this growing segment of our population. The composition and changes in the group are presented by age, sex, marital status, education, employment and income. Special attention is given to living arrangements, including those of people who are institutionalized or living alone. The final chapter looks to the future, identifying the health promotion movement and the kind of services our seniors will require.

96-313-XPE

Languages in Canada. Census. Released 1994. Bilingual edition.
ISBN 0-13-150814-8

Who is speaking what in Canada? This report looks at two aspects of the ever-fascinating topic of language in this country. First, it examines the demographics of language groups and the factors that have an impact on their size and growth. Next it focuses on the language knowledge of Canadians and the use of various languages.

96-315-XPE

Female baby boomers: a generation at work. Census. Released 1994. Bilingual edition.
ISBN 0-13-150905-5

How has employment changed for women over the twenty-year span from early to middle and late baby boom groups? The evolution of women in the work force is examined in this report, comparing demographic characteristics, level of education, marital status and number of children for women from these three groups. The report reviews their professions and work arrangements. The final chapter looks at revenues and the overall contribution of women to the family income.

The self-employed. Census. Released 1994. Bilingual edition.
ISBN 0-13-150871-7

Is being self-employed really economically attractive? Or is it chosen due to circumstances? This report focuses on two types of self-employed workers in Canada: those with and without paid help. These groups are analyzed in terms of their demographic make-up, labour characteristics, industries and occupations. It casts new light on the common perception of the self-employed as an advantaged group.

96-317-XPE

The earnings of Canadians. Census. Released 1994. Bilingual edition.
ISBN 0-13-310327-7

During the mid 1980s, Canadians suffered through one recession and, at the taking of the most recent census, were in the midst of another. This study provides insights into the picture of employment in Canada, tallying earnings by sex, age group, marital status, education, major field of study and selected occupations. The differences between male and female earnings are reported, including changes since 1985. The relationship between work activity and earning is examined. The report concludes with a look across provinces at changes in overall earnings from 1970 to 1990.

96-318-XPE

Family income in Canada. Census. Released 1994. Bilingual edition.
ISBN 0-13-310368-4

Changes in family incomes and purchasing power between 1970 and 1990 are traced, highlighting the impact of the recession of the early 1980s. The study analyzes the consequences of changing work and education profiles of the spouses on the incomes of husband-wife families. The incomes of lone-parent families are examined in terms of their work and age patterns. Changes in the characteristics of families at different levels of income and in income inequality between 1970 and 1990 are discussed. Finally, changes in the regional disparities are examined.

Monograph Series

96-321-MPE

1991 Census monograph series. Census. First issue December 1996. English and French editions.

Statistics Canada is publishing, by means of Nelson Canada, a series of eight high level analytical products in the form of books of 300 to 500 pages each suitable as textbooks or reference books at the senior undergraduate and graduate levels and suitable to support policy analysis and socio-economic research. The topics of these books include growing old in Canada, women and the labour market, education, immigration, incomes in Canada, employment, the Canadian family and Aboriginal demographics.

96-321-MPE no.1

Growing old in Canada. Census. Released 1997. English and French editions.
ISBN 0-17-605633-5

Growing old in Canada, by Eric Moore and Mark Rosenberg, addresses the issues related to the fact that Canada's population is aging. The book examines in detail individual and population aging, the geographic dimensions of aging including aging-in-place and migration, the health and physical limitations aspects of aging and projects the elderly population and the disabled and institutionalized components of this population to the year 2011.

1991 CENSUS OF AGRICULTURE

REFERENCE PRODUCT

92-303-XPB

1991 Census of Agriculture products and services. Census. Released April 1992. Bilingual edition.
ISBN 0-660-57100-5

This product helps users to identify which product or service best fulfills their data requirements and serves as a guide to better understand the concepts and variables of the Census of Agriculture. This publication provides complete details on the full line of census of agriculture products and services, including pricing and ordering information. Descriptions of the geography used in the census as well as useful background information on the census are also included.

Free.

DATA PRODUCTS

The Data Products series comprises 23 publications, of which 22 provide an agricultural profile of Canada and the provinces.

93-348-XPB

Census overview of Canadian agriculture: 1971-1991. Census. Released June 1992. Bilingual edition.
ISBN 0-660-57101-3

This publication compares data from the censuses of agriculture from 1971 to 1991 at the Canada and provincial levels. One set of tables provides basic counts, totals and percentage changes for a large number of variables. A second set of tables presents size class distributions for selected crop, livestock, receipts and farm type variables. This 1991 Census of Agriculture data product has been created for those who want to analyse historical trends in Canadian agriculture and current socio-economic aspects of the farm population.

	<i>Per Issue</i>
<i>Canada:</i>	\$49.00
<i>United States:</i>	US \$59.00
<i>Other Countries:</i>	US \$69.00

Agricultural Profile Series

To improve the timeliness of the data products, the profiles are offered in two parts. The 11 Part 1 profiles, available in the third quarter of 1992, provide basic counts and totals for all 1991 Census variables for Canada (including selected variables for the Yukon and Northwest Territories) and each province. The 11 Part 2 profiles, available in the fourth quarter of 1992, reveal the scope and demonstrate the analytical potential of the data by including demographic information on farm operators and members of their households, cross-classified tables, as well as historical and small area data.

Users can benefit by ordering Part 1 and Part 2 publications for any province or Canada as a package. The package price represents a 20% discount from the total cost of the individual publications. As well, the complete set of Part 1 and Part 2 publications (22 volumes) may be purchased as a package,

1991 CENSUS

at the same 20% discount. Other publication packages are available and users should consult the 1991 Census of Agriculture Products and Services publication, catalogue no. 92-303-XPB, for more details.

Part 1 publications present basic counts and totals for all variables at the provincial, census agricultural region and census division levels. Maps displaying the census agricultural regions and census divisions for the province are included. The 1991 Census of Agriculture questionnaire is also included for users' reference.

Part 2 publications present selected small area and cross-classified agricultural data from the 1991 Census of Agriculture, as well as selected demographic characteristics of farm operators and the farm population. In addition, it includes a broad range of data from the 1971, 1976, 1981, 1986 and 1991 Censuses of Agriculture.

93-350-XPB

Agricultural profile of Canada. Part 1. Census. Released July 1992. Bilingual edition.
ISBN 0-660-57103-X

This publication presents national and provincial basic counts and totals for all 1991 Census of Agriculture variables, including selected data for the Yukon and the Northwest Territories.

1991 CENSUS

ANALYTICAL PRODUCTS

This series of three publications provide users with concise descriptive analysis of key agricultural and socio-economic variables from the 1991 Census of Agriculture and those from the agriculture-population database. The products have been developed with a wide audience in mind and include numerous tables, graphs and maps to support the analysis presented. The analytical products can also be purchased as a publication packages. Users should consult the 1991 Census of Agriculture Products and Services publication, catalogue no. 92-303-XPB, for more details.

96-301-XPB

Canadian agriculture at a glance. Census. Released October 1994. Bilingual edition.
ISBN 0-660-57272-9

This publication is a collection of feature articles, supported by graphs, tables and charts, providing an analysis of the human side of agriculture and rural life. Topics include farm women, farm families, farm labour and socio-economic characteristics of the farm and rural population.

More than 30 authors have contributed 51 feature articles, covering a wide range of topics from the apple industry to the role of the women in agriculture. Its 11 chapters will inform you with articles such as "The Canadian farm family - more like the family next door!", "Canadian farmers - in tune with their environment", and "Udderly amazing - Daisy's producing lots more milk in the nineties". Drawn from a variety of sources, it presents a comprehensive picture of agriculture. It is a valuable source of information for anyone in agribusiness, academics, teachers and students. So whether you have little knowledge of agriculture or are an experienced data user, you will find this a useful reference.

Per Issue

Canada:	\$ 49.00
United States:	US\$ 59.00
Other Countries:	US\$ 69.00

96-303-XPE

Trends and highlights of Canadian agriculture and its people. Census. Released December 1992. English and French editions.

ISBN 0-660-14306-2

This publication features highlights from the 1991 Census of Agriculture and from the agriculture-population database in two segments. They discuss emerging trends in the agricultural sector and the people involved in Canadian agriculture.

The first segment (96-303-XPE) highlights selected agricultural data such as farm type, receipts and expenses as well as selected demographic data such as age, sex, marital status and mother tongue of farm operators and the farm population. The second segment, released as supplement 96-303-SPE, focuses on socio-economic aspects, such as education and income of farm operators and the farm population. Analysis is supported by data presented in graphs and tables.

Per Issue

Canada:	\$29.00
United States:	US \$35.00
Other Countries:	US \$41.00

96-303-SPE

Trends and highlights of Canadian agriculture and its people. Census. Released December 1993. English and French editions.

ISBN 0-660-14307-0

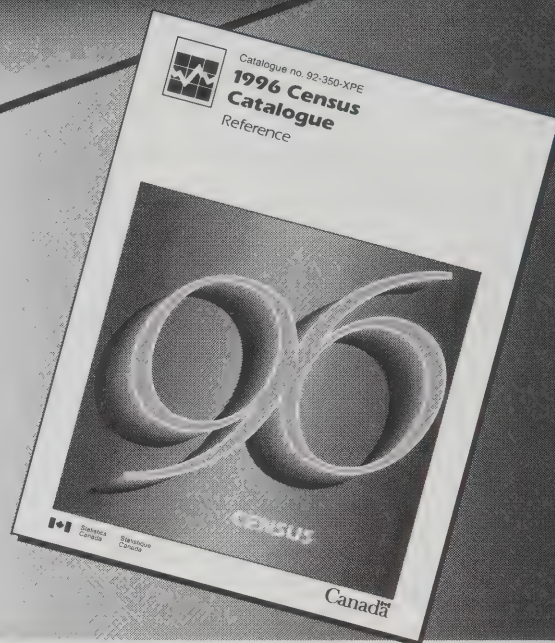

This supplement to 96-303-SPE presents socio-economic analysis of the 1991 Census of Agriculture-Population Database. These data cover the education, occupation and mobility of farm operators. The text is supplemented by many graphs and tables.

Note: 96-303-XPE was released in December 1992 in a binder. Those who purchased it automatically receive the 96-303-SPE free. The third and final part which was supposed to be released in June 1994 will never be released.

Free if first part was purchased.

To point you in the right direction

The *1996 Census Catalogue* is an indispensable tool when you are looking for information on census products and services.

The catalogue includes:

- ✓ full product descriptions, catalogue numbers, prices, media, and release dates
- ✓ table titles
- ✓ description of services
- ✓ contact points for further help
- ✓ ordering information

Available fall 1997. To order this publication (Catalogue no. 92-350-XPE, \$15, print) contact your nearest Statistics Canada Regional Reference Centre, or call our national order line. You can also order through the Statistics Canada Web site.

Whatever your interest in agriculture, the Census of Agriculture is your *Key Information Source* at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight *and* the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture*, *Agricultural Profiles (Canada and provinces)*, *Profile of Canadian Farm Operators* and *Canadian Agriculture at a Glance*.

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.

To order publications, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard. Via Internet: order@statcan.ca

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

A MAJOR SOURCE OF INFORMATION

On May 14, 1996, Statistics Canada conducted both the Census of Population and the Census of Agriculture in order to develop a statistical portrait of Canada and Canadians on one day. The census is designed to provide information about people, housing units and farms in Canada by their demographic, social and economic characteristics.

The Census of Population is a reliable basis for the estimation of the population of the provinces, territories and local municipal areas. The information collected is related to more than 80 federal and provincial legislative measures and provides a basis for the distribution of federal transfer payments. The census also provides information about the characteristics of the population and its housing within small geographic areas and for small population groups to support planning, administration, policy development and evaluation activities of governments at all levels, as well as data users in the private sector.

The Census of Agriculture provides a basic inventory of Canadian agriculture and is the cornerstone of Canada's agriculture statistics program. It provides comprehensive information, at low levels of geography, on the characteristics of farms and farm operators. Topics such as crop areas, number of livestock, land management practices, farm income and expenditures and work done by farm operators are obtained through the Census of Agriculture.

The Census of Agriculture is used by federal and provincial governments and agencies as well as the private sector in analyzing important changes occurring in the agriculture industry, in developing and evaluating agricultural policies and programs and in formulating decisions in production, marketing and investment in the agriculture sector.

The censuses take place every five years and provide an historical perspective on how communities and farms are changing and how the country is evolving over time.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

A first look at products and services from the 1996 Census

Since May 1996, the processes of collection, capture, coding, validation and tabulation of 11 million questionnaires have been initiated and are expected to continue until the Spring of 1997. At that time, the dissemination of the census products and services will begin. The *1996 Census Preview of Products and Services* is designed to provide a first look at the range of products and services available to clients. It contains information on release time frames, media choices, prices and levels of geography available for each product. Since the products and services line is still under development, the information available at the time of release of the *Preview* remains subject to change.

Internet users now can link to *Information on Products and Services* (IPS), Statistics Canada's new on-line catalogue on our Web site - <http://www.statcan.ca>. More detailed information about census products and services will gradually become available in IPS. As well, the *1996 Census Catalogue* will be released in the Fall of 1997. If additional information is required, clients should contact Statistics Canada Regional Reference Centres, located across the country.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

NEW FEATURES

New features of the Census of Population

There are six new major features for the Census of Population.

Delivery mechanisms

Based on client demand, the number of electronic products available from the census will increase significantly, however, key print products will be retained for specific market sectors. Emphasis will be placed on CD-ROM output which will link data and reference information and contain a new Windows-based presentation/tabulation software to facilitate ease-of-use of census data. However, C-91 DOS-based software will continue to be offered through Custom Services.

For the first time, clients will be able to obtain public good information free-of-charge on the Internet — including some census reference products and selected *Nation Series* tables — by accessing Statistics Canada's web site <http://www.statcan.ca>.

Small area data available faster

In response to client needs, profile data will be available for small areas at the community levels — census subdivisions (CSDs) and census divisions (CDs), on day of release of the variable. One month later, profile data for all remaining levels of geography (for each released variable) including census tracts (CTs), enumeration areas (EAs) and forward sortation areas (FSAs) will be available to clients.

Census data by postal code

Strong client demand had been expressed to obtain census data tabulations based on postal codes — the small geographic areas defined by Canada Post for mail delivery. As part of the standard products, Statistics Canada will provide Basic Summary Tabulations (BSTs) and Area Profiles for forward sortation areas (FSAs) which represent the first three characters of the postal code. FSAs for both urban and rural areas will be part of the program for the first time. Population and dwelling counts by postal code as well as a Digital Cartographic File of Forward Sortation Areas will be available and are based on the postal codes provided by census respondents. Through custom services, data for the full six-character postal codes or aggregations of postal codes can be obtained, subject to confidentiality restrictions.

New variables

Additional information will be available from the 1996 Census, including information on household activities, place of work for all levels of geography, mode of transportation to and from work and population groups.

Improved Geography Products

GeoRef, the tool which allows clients to explore links between all standard levels of geography (except postal code) and presents geographic codes and names, as well as population and dwelling counts, has been completely redesigned for 1996. This Windows-based application also contains new information, such as enumeration area reference lists.

For 1996, census reference maps showing most geographic areas will be available. However, some of the maps have been significantly improved over their 1991 counterparts — particularly for large urban centres. In addition, a map series has been re-introduced showing enumeration areas by federal electoral district (FED).

Revised pricing structure

Prices have been revised for 1996 Census products and services. Some prices have been lowered, in particular for many geography products.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

New features of the Census of Agriculture

The 1996 Census of Agriculture will provide expanded information on farm operators such as paid work not related to the agricultural operation, non-agricultural businesses operated and farm-related injuries. Also, data on the following topics will be available for the first time: capital improvements and purchases of capital assets, area of Christmas trees grown for sale and the number of trees harvested, manure application methods and the number of birds hatched in commercial hatcheries.

Data from the 1996 Census of Agriculture will be available for the first time on CD-ROM. Also, selected data will be made available on the Internet, free-of-charge, to coincide with the release of the databases.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

TOPICS AND DATES OF MAJOR CENSUS RELEASES

The topics into which data are grouped for 1996 — called *census variables* — will be featured in Statistics Canada's official release vehicle *The Daily* at the times indicated below.

Major Census Releases

April 15, 1997	Population and dwelling counts
May 14, 1997	Agriculture (farm variables)
July 29, 1997	Age and sex
October 14, 1997	Marital status/common law Families (Part 1 : type and structure) Structural Type of Dwelling and Household Size
November 4, 1997	Immigration and citizenship
December 2, 1997	Mother tongue Home language Official and non-official languages
Fall 1997	Agriculture (operator variables)
January 13, 1998	Aboriginal
February 17, 1998	Ethnic origin Visible minorities
March 17, 1998	Labour force activities Occupation and industry Household activities Place of work Mode of transportation to work
April 14, 1998	Education Mobility and migration
May 12, 1998	Sources of income Family and household income
June 9, 1998	Families (Part 2 : social and economic data) Occupied private dwellings Households and housing costs
Fall 1998	Agriculture - Population Linkage database

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

The following levels of geography will be available for Census of Population variables in 1996.

- Canada/provinces/territories
- Census metropolitan areas (CMAs)
- Census agglomerations (CAs)
- Census tracts (CTs)
- Census divisions (CDs)
- Census consolidated subdivisions (CCSs)
- Urban areas (UAs)
- Rural areas
- Federal electoral districts (FEDs)
- Enumeration areas (EAs)
- Forward sortation areas (FSAs)
- Postal codes
- Census subdivisions (CSDs)
- Designated places (DPLs)

There are two components to the information available at time of release of each Census of Population variable. The first is a full range of data described *The Nation series*, which contains data at the Canada, province/territory levels and for selected census variables, census metropolitan area level data. The second is *Census Area Profiles* for each of the census variables being released, at the census division (CD) and census subdivision (CSD) levels.

At the time of release of Census of Agriculture farm and farm operator variables, the following levels of geography are available: Canada, provinces, census agricultural region (CAR), census division (CD) and census consolidated subdivision (CCS) and selected variables at the territory level. Variables on the Agriculture-Population Linkage database are available at the Canada, province and census agricultural region.

Nation and Census Area Profile data for the Census of Population, as well as data from the Census of Agriculture, can be obtained through Regional Reference Centres. In addition, clients will be able to access selected *Nation* tables and selected agriculture data from Statistics Canada's web site - <http://www.statcan.ca>.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

CENSUS OF POPULATION PRODUCTS AND SERVICES

A number of census products and services have been developed using the 1996 Census variables. They are accompanied by reference material and geography tools to support the use of the data. The complete products and services line is divided into five major categories - reference, geography, standard data products, analytical products and custom services. A brief description of the major characteristics of each product follows.

Reference Products

A total of six reference products (excluding the *Preview*) are being produced for the 1996 Census. There are four general reference products and two geography reference products. These products contain information to support the use of census data products and services.

General Reference Products

Some census reference products will be accessible on the Internet through the Statistics Canada web site address — <http://www.statcan.ca> — at no charge to clients.

Catalogue

The *Catalogue* describes in detail the products and services available from the 1996 Census, how to obtain them, release dates, information on prices, media choices and levels of geography available.

Media: Print
Planned release date: Fall of 1997
Planned price: \$15

Dictionary

The *Dictionary* provides definitions for all the concepts, terms, census variables and geographic elements of the 1996 Census, to ensure clients have a proper understanding of the data and are able to interpret these data correctly. The *Dictionary* describes, in detail, both census and geography concepts and provides some information about comparability with previous censuses.

Media: Print
Release date: March 21, 1997
Price: \$25

Handbook

The *Handbook* provides a non-technical overview of the complete census process, from content determination to the dissemination of products and services. The *Handbook* also discusses data quality, confidentiality issues and gives examples of different applications of census data.

Media: Print
Planned release date: June 1997
Planned price: \$25

Technical Reports

The *Technical Reports* provide detailed information on the quality of the 1996 Census data and will assist users in assessing the applicability of the data for their own purposes. Topics covered in the reports include concepts and components of the census variables, collection and coverage, regional and head office processing/data assimilation, edit and imputation, data evaluation and quality, and historical comparability.

Media: Print
Planned release date: Beginning fourth quarter of 1998
Planned price: \$15

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Geography Reference Products

GeoRef

GeoRef is a data retrieval and tabular output tool. It provides the 1996 population and dwelling counts for all geographic areas excluding postal code, and all of the geographic reference information that a census data user will require, such as geographic codes and names. It also allows clients to explore the links between all standard levels of geography. The 1996 *GeoRef* includes additional information previously available in other separate products which are no longer being produced, such as the correspondence between enumeration areas from the 1996 and 1991 Censuses (EA Correspondence), reference lists of component enumeration areas for higher geographic levels (EA Reference Lists), as well as the enumeration area reference map titles to facilitate the identification of the appropriate maps for a given enumeration area.

Media: CD-ROM
Release date: April 15, 1997
Price: \$60

Reference Maps

Census *Reference Maps* identify census geographic areas and locate their boundaries, allowing clients to relate census data to actual physical locations on the ground. The following reference maps will be produced for the 1996 Census:

- Census Divisions/Census Subdivisions
- Census Metropolitan Areas/Census Agglomerations/Census Tracts
- Federal Electoral Districts/Enumeration Areas
- Enumeration Areas

Media: Print
Release date: April 15, 1997
Price: Minimum order \$60

Geography Products

Seven geography products are being produced for the 1996 Census.

Digital Boundary Files (DBF) and Digital Cartographic Files (DCF)

Digital Boundary Files portray the official boundaries used for 1996 Census collection and, therefore, often extend as straight lines into bodies of water. In Digital Cartographic Files, these boundaries were modified to follow the coastlines and shorelines on the perimeter of Canada's land mass, including major islands. The Digital Cartographic Files also include a separate map layer showing lakes and some rivers and estuaries. This "water" layer can be used for additional reference purposes when mapping or displaying the boundaries. Digital Cartographic Files provide a framework for thematic mapping and geographic analysis that are possible using commercially available geographic information systems (GIS) or other mapping software. Digital Boundary Files may not be suitable for mapping or display where realistic shoreline is required.

Media: Diskette, CD-ROM, MapInfo and ARC/INFO EXPORT formats
Release date: April 15, 1997
Price: \$100 to \$9,800 depending on geographic coverage required

Street Network Files (SNF)

Street Network Files contain streets, railroad tracks and other pertinent information such as street names and address ranges for most large urban centres in Canada. When used with an appropriate mapping software, SNFs can be applied to route planning, site location, delivery services and mapping. Major updates are expected to the street and address information from the 1991 version.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Media:	Diskette, CD-ROM, MapInfo and ARC/INFO EXPORT formats
Planned release date:	Fourth quarter of 1997
Planned price:	\$200 to \$20,000 depending on geographic coverage required

Skeletal Street Network Files (SSNF)

Skeletal Street Network Files contain major roads and railways (selected from the Street Network Files) with names but no address ranges for most large urban centres in Canada. When used with appropriate mapping software and the Digital Cartographic Files, SSNFs provide cartographic reference features for thematic maps.

Media:	Diskette, CD-ROM, MapInfo and ARC/INFO EXPORT formats
Planned release date:	Fourth quarter of 1997
Planned price:	\$100 to \$2,900 depending on geographic coverage required

Postal Code Conversion File (PCCF)

The Postal Code Conversion File links the six-character postal code with the standard 1996 Census geographic areas. It also provides coordinates for a point representing the approximate location of the postal code to support mapping applications. The PCCF is updated on a semi-annual basis.

Media:	Diskette, CD-ROM
Planned release date:	Fourth quarter of 1997
Planned price:	\$200 to \$9,000 depending on geographic coverage required

Postal Code/Federal Riding File (PCFRF)

The Postal Code/Federal Riding File provides a link between the six-character postal code and the codes and names of Canada's federal electoral districts (1996 Representation Order). The PCFRF is updated on a semi-annual basis.

Media:	Diskette, CD-ROM
Planned release date:	Fourth quarter of 1997
Planned price:	\$2,900 for Canada

Block-face Data File (BFDF)

A block-face is generally one side of a city street between two consecutive intersections. The BFDF contains 1996 Census population and dwelling counts for block-faces in urban centres covered by Street Network Files. It also links the block-face to all higher levels of standard geography (enumeration areas and above) through geographic codes. The file includes street names with address ranges as well as coordinates for a point representing the approximate centre of each block-face. This file can be used in conjunction with Street Network Files in geographic information systems (GIS) applications.

Media:	Diskette, CD-ROM
Planned release date:	Fourth quarter of 1997
Planned price:	\$100 to \$300 depending on urban centre

If the standard geography product line identified above does not meet a client's individual needs, a custom geography product may be requested. Examples include special data retrievals or file merges using any of the geography information, and custom mapping.

Standard Data Products

The 1996 Census will provide a full range of standard data products combining census variables in different ways to meet the general needs of clients. A total of six standard data product lines will be produced. Selected standard data tables (the *Nation* series) will be available free-of-charge through Statistics Canada's Internet address - <http://www.statcan.ca>.

Population and Dwelling Counts

The first information to be released from the 1996 Census is data on the geographic distribution of Canada's population and dwelling counts, at all levels of geography. These data (except postal code) can also be found on the GeoRef CD-ROM product (described earlier). Population and dwelling counts for postal codes are available in the Postal Code Counts CD-ROM product.

Geography:	Canada/province/territory, FED (1987 RO), CD/CSD, CCS, CT, CMA/CA, PCMA/PCA, UA, DPL, ER, EA, FSA and postal code
Media:	Print, CD-ROM, diskette
Release date:	April 15, 1997
Price:	\$40 - \$60 (depending on media)

Nation Series

This series provides detailed data for all census variables for higher levels of geography. In many cases, the tables include an historical perspective from previous censuses.

Geography:	Canada/province/territory and CMA
Media:	CD-ROM, diskette
Planned release date:	Beginning fourth quarter of 1997
Planned price:	\$60 (for each release of variables)

Census Area Profiles

Census Area Profiles are designed to provide a statistical overview or profile for lower levels of geography.

Geography:	FED, CD/CSD, CMA/CA, CT, FSA, EA
Media:	Diskette, CD-ROM, print
Planned release date:	Third quarter of 1998 (electronic) First quarter of 1999 (print for CD/CSD and CT)
Planned price:	Between \$65 and \$8,100 (depending on media and geography level) Basic Summary Tables (BSTs)

Basic Summary Tables (BSTs)

This series aims at providing tabulations of two or more inter-related census variables for lower levels of geography. There are approximately 75 tabulations in the series.

Geography:	FED, CD/CSD, CMA/CA, CT, FSA, EA
Media:	Diskette
Planned release date:	Beginning first quarter of 1998
Planned price:	Base price \$60, with first 100 regions priced at \$1 each and additional regions at \$0.05

Dimensions Series

The analytical depth of census information is shown in this series with information packaged on special interest subjects linking a number of census variables.

Geography:	Canada/province/territory - Lower levels of geography for a limited set of census variables
Media:	CD-ROM
Planned release date:	Throughout 1998 and 1999
Planned price:	\$60 (per CD-ROM)

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Public Use Microdata Files (PUMF)

Unique among census products, *Public Use Microdata Files* allow clients to work with records containing non-aggregated information and to conduct their own analysis and research. Special measures have been taken to ensure that confidentiality is maintained for the three microdata files which are produced: one on individuals, a second on families and a third on households. These products provide data based on a three per cent sample from the 1996 Census.

Geography:	Canada/province/territory - Selected CMAs
Media:	CD-ROM and tape
Planned release date:	Beginning first quarter of 1999
Planned price:	\$1,000 each file, \$1,300 for two files, \$1,500 for three files

Analytical Products

Statistics Canada analysts will publish a series of general interest articles on contemporary social, demographic and economic issues which will emerge from the 1996 Census. These articles will appear in a variety of Statistics Canada's periodicals such as *Canadian Social Trends*, *Canadian Economic Observer* and *Perspectives on Labour and Income* as well as other professional statistical and demographic journals. *The Daily*, published on each day of a major release, will also provide analytical highlights and a notation of significant trends.

Media:	Print articles in existing Statistics Canada publications and periodicals
Planned release date:	Throughout 1998 and 1999
Planned price:	Subscription prices and individual issues vary by periodical

Tabulation Services

Standard Product Services

Using an electronic warehouse of pre-tabulated information (Electronic Shelf), census consultants can retrieve standard published data, in whole or for selected standard geographic areas, on behalf of clients. Output can be directed to print or to diskette in a variety of commonly used data formats.

Price is based on product type and volume of data accessed. The minimum price per retrieval is \$60.00. Further details on this service are available from the Statistics Canada Regional Reference Centre nearest you.

Custom Data Products and Services

Census custom products are developed to meet the specific requests of clients in terms of content, geography, format and output medium. The products consist of custom cross-tabulations and semi-custom profiles. Custom cross-tabulations allow clients to determine the content, geography, format and output medium of their data. Semi-custom profiles provide a cross section of census variables for which clients can specify their own geography and medium.

Clients may also define their own geographic areas of study to be used in custom tabulations through the service known as geocoding. Examples include school zones, planning zones, postal walks, etc.

Availability

Tabulations can be produced from both the 100% and 20% data bases for the 1971, 1976, 1981, 1986, 1991 and 1996 Censuses. 100% data on age, sex and marital status, for use in custom products will be available beginning in the third quarter of 1997. The remaining census variables from the 20% sample will be available beginning in the fourth quarter of 1997.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Pricing

Pricing is based on the consulting time, geographic level, data processing requirements and media required to complete a client request. For custom cross-tabulations, the minimum price is approximately \$1,000 per table. The minimum price for semi-custom profiles is approximately \$200.

Media

Products will be available in a variety of output media, including computer printout, mainframe/UNIX tape, diskette and CD-ROM. Output designed for use in a PC environment can be packaged with Statistics Canada's DOS or Windows-based viewing software. Specialized formats required for compatibility with various computer systems can be provided in most cases.

Service Points

Clients will be served directly by the census consultants at the Statistics Canada Regional Reference Centre nearest to them, with the exception of Federal Government clients who should contact Statistics Canada's Head Office in Ottawa.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

CENSUS OF AGRICULTURE PRODUCTS AND SERVICES

The 1996 Census of Agriculture offers data users a wide range of data and analytical products as well as custom and semi-custom services.

Data Products

Data products present the 1996 Census of Agriculture results in convenient and comprehensive formats. Using concise tables, this series presents data for farm variables and farm operator characteristics in the following products:

Historical Overview of Canadian Agriculture

This publication is an updated and expanded version of the very popular historical publication introduced in 1991. It presents basic counts, totals, percentage changes and percent distributions for an expanded set of variables at the Canada and province levels for an expanded set of variables at the Canada and province levels for the 1976, 1981, 1986, 1991 and 1996 Censuses of Agriculture. Two new sections have been added for 1996: the first presents 75 years of Census of Agriculture data (1921 to 1996) for selected variables and the second highlights the change between 1991 and 1996 in the series of land management practices variables introduced in 1991.

Geography:	Canada, province
Media:	Print
Planned release date:	June 1997
Planned price:	\$49

Agricultural Profiles

These eight data publications (Canada, Atlantic provinces and six other provinces) provide the basic counts and totals for all 1996 Census of Agriculture farm variables.

The Canada publication presents a group of area profile tables at the Canada and province levels and two additional tables which present selected variables cross-classified by gross farm receipts and farm type at the Canada level. Also included are selected data for the Yukon and Northwest Territories.

The seven remaining publications present area profile tables for all farm variables at the province, census agricultural region and census division levels. Three additional tables include: a small area table with selected variables tabulated at the census division and census consolidated subdivision levels and two cross-classified tables at the province level.

Each publication contains reference maps which identify the location of all geographic areas tabulated.

Geography:	Canada, province, territory, census agricultural region, census division and selected variables at the census consolidated subdivision level
Media:	Print
Planned release date:	July 1997
Planned price:	\$39

Profile of Canadian Farm Operators

This new publication presents Canada and province level data on farm operator characteristics from the 1996 Census of Agriculture questionnaire (e.g., types of work done, operation of non-agricultural businesses, farm-related injuries) and selected agricultural variables (e.g., farm type, gross farm receipts) cross-classified by the number of operators per farm as well as the age and sex of farm operators. In addition, a breakdown of the total population and farm population by age, sex and residence in rural and urban areas is provided. Historical comparison tables displaying the changes that occurred between the 1991 and 1996 Censuses of Agriculture are also included.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Geography:	Canada, province
Media:	Print
Planned release date:	Fall of 1997
Planned price:	\$39

1996 Census of Agriculture CD-ROM

Data from the 1996 Census of Agriculture, selected data from the Agriculture-Population Linkage database and historical databases will be available for the first time on CD-ROM. This product will be released in two phases to accommodate the availability of data. The first release will contain all farm and farm operator variables from the 1996 Census of Agriculture. The second release will contain additional selected data from the 1996 Agriculture-Population Linkage database and historical databases.

Geography:	Canada, province, census agricultural region, census division, census consolidated subdivision
Media:	CD-ROM
Planned release date:	Release 1 - Fall of 1997 Release 2 - Fall of 1998
Planned price:	\$2,500

Analytical Product

Canadian Agriculture at a Glance

A repeat of the very successful 1991 publication will be produced for the 1996 Census of Agriculture. Building on the effective presentation format introduced in 1991, it will include a series of short analytical articles employing maps and graphics to present the data. New for 1996 will be the inclusion of articles presenting agriculture-related data from other sources such as transportation, food consumption and food processing to provide a more complete picture of Canada's agri-food industry.

Geography:	Canada, province
Media:	Print
Planned release date:	Spring of 1999
Planned price:	\$49

Custom Data Products and Services

Tabulations and products to meet specialized needs

The User Services Unit of the Census of Agriculture can tailor products and tabulations to meet the special data requirements of clients. Custom tabulations allow the user to create personalized tables from the 1996 Agriculture and Agriculture-Population Linkage databases as well as the historical databases. Custom tabulations are available for the 1966 to 1996 Censuses. (Agriculture-Population Linkage databases were not created for the 1966 and 1976 Censuses.) Custom thematic maps, to visually display data, can also be produced to meet the client's specifications.

Subject to confidentiality restrictions, custom tabulations and maps can be produced for Census of Agriculture standard geographic areas as well as user-defined areas.

Semi-custom products created from the standard tabulations are also available for clients who are only interested in specific variables or certain standard geographic areas.

Availability

Data from the 1996 Census of Agriculture database will be available starting May 14, 1997. Data from the Agriculture-Population Linkage database will be available starting in the Fall of 1998.

1996 CENSUS PREVIEW OF PRODUCTS AND SERVICES

Pricing

Pricing is based on consulting time, number of geographic areas requested, data processing requirements and media required to deliver the custom or semi-custom product.

Media

Various formats are available depending on the users' requirements including paper, diskette or CD-ROM. Retrieval software can be included with the diskette or CD-ROM product.

Service Points

Clients can be served by contacting the nearest Statistics Canada Regional Reference Centres or the User Services Unit, Agriculture Division in Ottawa.

THE STATISTICS CANADA EARLY MORNING START-UP SPECIAL

Every morning at 8:30 a.m., Monday to Friday, Internet users can display the day's top socio-economic data simply by selecting **Daily News** on Statistics Canada's Web site at www.statcan.ca. There is no charge for this service.

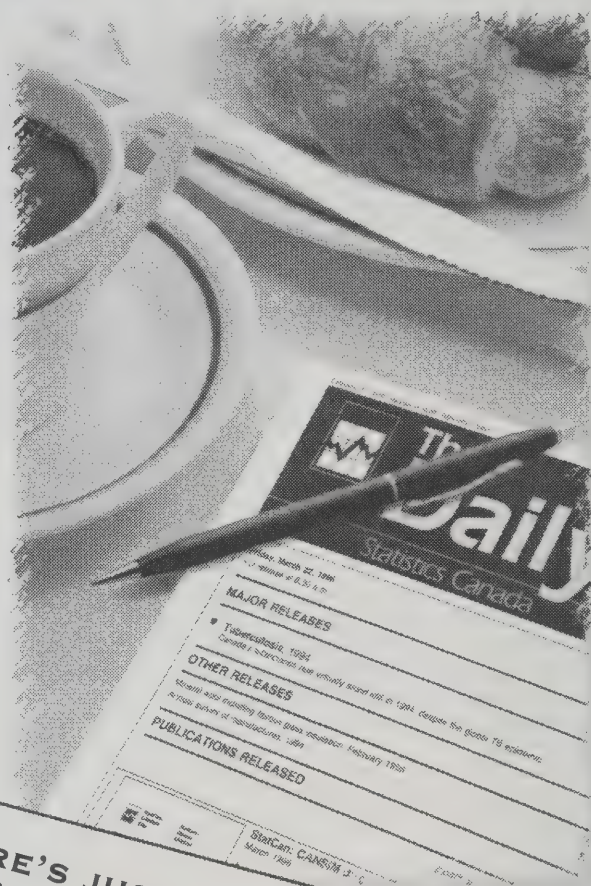

The Daily is an early-bird review of the latest official data and information released by Statistics Canada. Key economic indicators like employment rates and the Consumer Price Index, in addition to a wide range of business-related information, make **The Daily** the #1 choice for business people who want to keep up-to-date on the country's most important economic developments ... as they happen. It is also the best source for concise briefs on the state of the economy and Canadian society in general.

FIND OUT WHY JOURNALISTS ACROSS CANADA ACCESS **THE DAILY EVERY** WORKING DAY

The media has long relied on **The Daily** for the information contained in many of the news reports Canadians read or listen to on a regular basis. Now you, too, can link up to this same information quickly and conveniently. What's more, **The Daily** will keep you tuned to the timing and delivery of major Statistics Canada releases and the arrival of our newest products and services.

So, pull up a chair and visit us at our Web site soon. We want your day to get off to the right start.

ISSN 1181-6635

Note: This publication has been replaced by the new annual publication, 87-211-XPB Canada's culture, heritage and identity: a statistical perspective

INDEX

NOTES ON THE INDEX

- This is a combined subject and title index. There is no author index.
- Each index entry is followed by a number which corresponds to the numerically arranged contents of the catalogue. Title entries are in italics.
- Initial articles (e.g. "the") are disregarded in the alphabetical arrangement of the index. Titles beginning with a date or numeral precede alphabetic entries.
- Cross references are used to direct users to the preferred term.

Example: **CPI** *see* Consumer price index

If you do not find specific subjects or commodities in the index, check for broader search terms.

- Article level indexing from January 1994 to the end of March 1997 for all issues of our flagship publications is included in this index:

11-008-XPE *Canadian social trends*
 11-010-XPB *Canadian economic observer*
 75-001-XPE *Perspectives on labour and income*
 82-003-XPB *Health reports*
 85-002-XPB *Juristat*

In some cases there will be duplicate references to the same issue of a publication. This indicates that more than one article in that issue deals with that particular subject.

1-disability, 2-housing (*The Aboriginal Peoples Survey 1991*) 89-535-XPB

1991 Census catalogue (second edition) (*Reference products: 1991 Census of Population*) 92-302-XPE

APPENDIX 1

Statistics Canada Catalogue Numbers¹

A catalogue number consisting of a 10 character alphanumeric code is assigned to uniquely identify each product or service.

For example:

89F0029XPE *Bibliographic employment equity database*

89 - the first two characters constitute the subject group (in this case Social Analytical Studies).

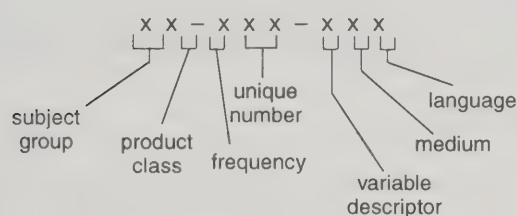

F - the third character indicates the product class (in this case fixed product).

0029 - the fourth through seventh characters comprise a unique number given to each product or service. Note that for official publications, the fourth through the sixth characters comprise the frequency indicator and unique number; the seventh character is a hyphen.

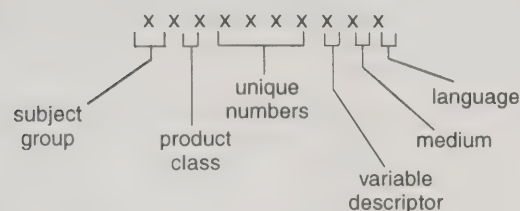

X - the eighth character is the variable descriptor used to indicate whether the product is preliminary, a revision, a supplement, an update, part of a series of monographs, a guide, a license, or a product complete in itself (X indicates not applicable here).

P - the ninth character is the medium (in this case paper).

E - the tenth character indicates the language of the product or service (in this case English).

Catalogue numbers for books/reports

Catalogue numbers for all other products

Catalogue number components

Subject Group: Indicates the principal subject area of a product or service.

General and Reference

- 10 Statistics Canada Metadata
- 11 Compendia
- 12 Reference and Working Manuals
- 13 Income, National Accounts
- 14 Productivity measures
- 15 System of National Accounts, Industry and Commodity Statistics
- 16 Seasonal Variations, Environmental Publications
- 17 Small Area Data
- 18 Special Studies

Primary Industries

- 21 Farm Income, Value and General Production
- 22 Farm Crops
- 23 Farm Livestock and Animal Products
- 25 Forestry
- 26 Mining

Manufacturing

- 31 General Surveys
- 32 Foods, Beverages and Tobacco
- 33 Leather and Rubber Products
- 34 Textiles and Apparel
- 35 Wood and Furniture Products
- 36 Paper Products and Printing
- 41 Primary Metals (Manufactured) and Fabricated Metal Products
- 42 Machinery and Transportation Equipment
- 43 Electrical Equipment
- 44 Non-metallic Mineral Products
- 45 Petroleum and Coal Products
- 46 Chemicals
- 47 Miscellaneous Manufactures

Transportation, Communications and Utilities

- 50 Transportation - General
- 51 Air Transport
- 52 Rail Transport
- 53 Road Transport
- 54 Water Transport
- 55 Pipe Line Transport
- 56 Communications
- 57 Other Utilities

¹ Since this catalogue contains primarily print products, it does not contain examples of the full range of catalogue numbers.

APPENDIX 1

Commerce, Construction, Finance and Prices

- 61 Business Conditions
- 62 Prices and Consumer Expenditure
- 63 Merchandising and Services
- 64 Construction and Housing
- 65 International Trade
- 66 International Travel
- 67 Balance of Payments and International Investments
- 68 Government Finance

Employment, Unemployment and Labour Income

- 71 Labour Force
- 72 Employment and Earnings
- 73 Unemployment Insurance
- 74 Employee Pension Plans
- 75 Labour Analysis and Employment Issues

Education, Health, Culture and Social Issues

- 81 Education
- 82 Health Reports and Public Health
- 83 Hospitals and Health Personnel
- 84 Vital Statistics
- 85 Justice Statistics
- 87 Culture Statistics
- 88 Science and Technology
- 89 Social Analytical Studies

Demographic and Intercensal Studies

- 91 Population Estimates, Projections and Analysis

Census

- 92 All reference documents such as the census dictionary, catalogue and technical reports for both the Census of Population and the Census of Agriculture
- 93 Data publications in which the data are primarily aggregated at the national level
- 94 Data publications presenting statistical information on themes identified as being of considerable public interest during the consultation process.
- 95 Subprovincial data arranged geographically by province.
- 96 Descriptive analytical publications that look at current, social, economic and demographic characteristics of Canadians, primarily using a narrative form with supporting tables and documents
- 97 Various custom services - Census

Product Class: Types of products or services that Statistics Canada produces.

- (Books/reports and their electronic or microfiche versions):

This category includes mainstream publications, including serials, analytical studies, research papers and records of proceedings.

Fixed product:

A standard product in any medium with a fixed price, which is held in stock, and distributed by Subject Matter Divisions and/or Statistics Canada Regional Reference Centres is considered to be a "fixed product". Basic summary tabulations, electronic shelf tables and paper shelf tables fall into this Product Class.

Custom Retrievals:

These are services provided in response to the client's specific requirements. Such services require that Statistics Canada personnel produce custom-tailored analyses or sets of data derived from Statistics Canada databases in accordance with client defined parameters.

Microdata File:

These contain records of responses to Statistics Canada's surveys purged of individual information to ensure confidentiality.

Internal Documents:

This group of products consists for the most part publications that are generically called "grey literature", for example internal reports, conference papers, annual reports or uncollected working papers. The material is likely to be available only from the Statistics Canada Library and Information Centre.

Surveys:

These are special surveys which are sponsored by various clients under contract, to provide statistical data that is not part of an existing national program.

Other:

This is used for all other activity that Statistics Canada does, for example external recovery of salary and conference room rentals. Workshops and conferences fall into this category.

Unique Number:

A unique number applied to that product or service.

For books/reports (products with the product class designator of a "-"), the number immediately following the "-" indicates the frequency of the book/report. This frequency indicator is followed by a unique sequential accession number. For all other product classes the unique number is a sequential accession number without a frequency indicator. The frequency indicator for books/reports is as follows:

- 0 - Daily/Weekly/Monthly/Seasonal/Quarterly/Semi-Annual
- 1 - Census
- 2 - Annual
- 3 - Census
- 4 - Biennial
- 5 - Occasional
- 6 - Irregular

Variable Descriptor: Used to further define the type of product where necessary.

APPENDIX 1

Preliminary:	A product generally produced before the final conformation of data.	Diskette:	A computer readable diskette.
Supplement:	Additional information added to an existing product; this information cannot stand on its own.	Microfiche:	A set of microfiche transparencies.
Revision:	A revision to an already published product; this can also be an Errata.	CD-ROM:	A CD-ROM.
Update:	Sections added to or replacing existing chapters in a product.	Internet:	The product is available on the Internet.
Guide:	User guides or guides to other Statistics Canada products.	Kit:	Comprised of more than one product and usually mixed media.
Monographic series:	A series of individual monographs, typically a research paper series.	ONline:	Electronic retrieval by the client, for example <i>StatsCan Online</i> .
Licence:	Licensing agreements.	Paper/Print:	Produced on paper.
X:	Not relevant to this product. Most products have an "X".	Fax:	Information is sent to client by facsimile.
Medium:	The medium in which the product is delivered to the client.	Symposium:	This is used in the numbers for the symposia held by Statistics Canada.
Audio-cassette:	An audio-cassette.	OtHer:	Other delivery mode, for example workshops or user fees of various kinds.
Braille:	The product being sent to the client is in Braille.	Language:	The language in which the product is provided.
Tape:	A computer readable tape.	E	English: The product being sent to the client is in English.
		F	French: The product being sent to the client is in French.
		B	Bilingual: The product being sent to the client is in both official languages.

APPENDIX 2

Ordering Publications

Types of Publications

Subscribing to Periodicals

You can subscribe to any Statistics Canada publication that is issued regularly. In the *Catalogue*, such publications are identified as daily, weekly, monthly, quarterly, semi-annual or annual. All subscribers are sent their publication on the day it is released.

When completing the order form, remember to list the annual subscription price and write an "S" (subscription) in the issue column.

When you order a subscription you will be sent the next issue released. The length of time it takes to receive your first issue depends on the frequency of the publication. There may be a period of up to three months before the next issue of a quarterly publication is released, and the release of a new annual publication may take up to 12 months, depending on the release date.

As a continuing service to our subscription clients, we issue renewal notices and reminder notices as your expiry date approaches to help ensure uninterrupted delivery of your publications. You will also be advised of related publications to allow you to update your statistical library.

Multi-year subscriptions, are available for up to three years on Statistics Canada's most popular titles. The following publications are eligible for multi-year subscriptions:

Canadian Economic Observer (11-010)

Canadian Social Trends (11-008)

Perspectives on Labour and Income (75-001)

Infomat (11-002)

Health Reports (82-003)

Multi-year subscriptions ensure that there will be no interruption in the issues sent to you, as well as reducing administrative costs. Subscription rates for the second and third year are the same as the currently listed price, so multi-year subscribers are also insulated against price increases.

When ordering, please indicate clearly the number of years for which you would like to subscribe.

Purchasing Single Issues

You may wish to order a single copy of a publication before subscribing for a full period. To order a single copy of any publication or series, remember to list the single issue price when ordering. You will receive a copy of the most recent issue. It takes up to two days to process your order for currently available issues of any publication. Orders for publications not yet released are placed on back order and will be shipped to you the day the publication is released.

Many publications listed in the *Catalogue* are issued only occasionally. When ordering these titles, simply list the applicable Canadian, U.S. or foreign price, along with the catalogue number and title. Again, you will receive a copy of the most recent issue. **Please note that pre-payment is required for the purchase of all publications.**

Ordering Publications

You may order any Statistics Canada publication using the order form at the back of this publication. **For existing clients, please give your client account number.**

Order by Mail or Fax (613-951-1584)

The signature of an **authorized company representative** is required on all orders.

Order your Statistics Canada publications by mail from...

Statistics Canada
Operations and Integration Division
Circulation Management
Jean Talon Bldg. 2-C12
Tunney's Pasture
Ottawa, Ontario
Canada
K1A 0T6

... or from one of our Regional Reference Centres listed in the front cover. For your convenience, retail distributors are also listed in the *Catalogue* (page 232).

Order by Phone

To minimize delays, use your Purchase Order number, MasterCard or VISA and call 1-800-267-6677 (in Canada or the U.S.) or (613) 951- 7277.

Regional Reference Centres are also pleased to take your telephone orders. Refer to the inside front cover for the list of telephone numbers.

To avoid double billing, please do not send written confirmation of phone or fax orders.

Purchase in Person

You can purchase publications at any Statistics Canada Regional Reference Centre, at many local bookstores, and from authorized agents' outlets (see **Retail Distributors** on page 232).

Payment

Cheques or money orders should be made payable to the Receiver General for Canada - Publications. Clients may also charge orders to MasterCard or VISA. Purchase Order numbers are also acceptable from authorized company representatives. Prepayment is required for all orders.

Canadian clients must pay in Canadian funds, adding 7% GST and applicable PST. Clients from the United States and other countries must pay in US\$ drawn on a U.S. bank.

APPENDIX 2

Renewals

For uninterrupted service, it is best to renew well in advance. Late renewal may result in missed issues that will have to be purchased separately, if available.

All customers will receive convenient renewal notices. A prompt reply to these will ensure continuous service. If you receive a renewal form or a reminder notice after you have mailed in your payment, please disregard it.

Prices

Prices listed in the *Statistics Canada Catalogue 1997* are for the 1997/98 fiscal year and reflect price changes effective April 1, 1997. At the time of printing, a number of 1997/98 editions of publications were yet to be released. In those cases, the currently available publication may be an earlier edition released prior to April 1, 1997 with a price that may differ from the catalogue price. To check current publication prices, call (613) 951-7277 or call any Statistics Canada Regional Reference Centre. They will gladly provide information or ordering assistance. For ordering assistance you may also call 1-800 267-6677. Prices are subject to change without notice.

Returns/Refunds

All sales are final except in the case of incorrect shipment. All returns must be pre-authorized by Statistics Canada. Details on this policy are available from Client Services staff. Call (613) 951-5078 (local calls) or 1-800-700-1033 for more information.

Clients who wish to cancel a subscription may receive a refund on undelivered issues only. Subscription issues already delivered may not be returned for a refund.

Change of Address

Subscribers must notify Statistics Canada at least one month in advance of a change of address to ensure uninterrupted delivery. Clients who fail to notify Statistics Canada of a change of address will be responsible paying for replacements of missed issues. Free replacements or refunds will not be issued.

With your notification, please include:

- your old address;
- your new address;
- your client account number.

Delivery Methods

All of our publications are delivered by first class mail. Delivery time to most parts of Canada is a few days. Clients who request a rush service with courier delivery must prepay a \$25.00 fee plus the courier charges.

DISCOUNTS ON STATISTICS CANADA PUBLICATIONS

Please note that discounts are applied to the price of the publication and not to the total amount which might include special shipping and handling charges, GST and applicable PST.

a) Educational Institutions and Public Libraries

Schools, school boards, colleges, universities and public libraries receive a 30% discount on all publications. If you're not sure whether your organization qualifies for a discount, call (613) 951-7277 (local calls), 1-800-700-1033 or your local Regional Reference Centre.

b) Retail Distributors

Standard trade discounts and returns policies are available to Retail Distributors. For more information, call Client Service Unit (613) 951-5078 (local calls) or 1-800-700-1033.

c) Volume Discounts

Volume discounts are offered on multiple copies of the same publication that are shipped to one address. The schedule of volume discounts follows.

10-25 copies - 20%

26-50 copies - 30%

51-100 copies - 40%

101 or more copies - call Circulation Manager at (613) 951-8926 to determine the discount that will apply to your order.

d) Back Issue Discounts

Clients are entitled to a 70% discount off the cover price of all designated back issues.

Periodicals, selected occasionals and 1991 Census publications are all included in the back issues program. *The Daily, Infomat, Survey Methodology* and the four most recent editions of *Canadian Social Trends, Perspectives on Labour and Income* and *Health Reports* are **excluded** from the program.

Statistics Canada fills orders for back issues as inventory permits. The minimum order, which must be prepaid, is \$20.00. Please contact our Sales and Service personnel at (613) 951-7277 to confirm price and availability.

e) Canadian Social Trends (11-008E) Discounts

Student - Students can subscribe to *Canadian Social Trends* at 30% off the regular subscription price of \$36.00 in Canada, US\$36.00 in other countries.

Multiple Subscriptions - Clients can receive five subscriptions to *Canadian Social Trends* for the price of three, provided all subscriptions have the same mailing address. This applies to any multiple of the 5 for 3 formula - a 40% discount.

APPENDIX 3

Depository Libraries

Statistics Canada Library and Information Centre

The Statistics Canada Library and Information Centre in Ottawa maintains complete current and historical records of all Statistics Canada publications, both catalogued and non-catalogued. The Library and Information Centre staff is available to help users find the required information.

Canada Year Book 1997

**The indispensable tool for
putting your data in context**

The publication you are reading at the moment provides vital information about a specific sector of activity in Canada, one of particular interest to you. But are you fully up to date with trends in other sectors, aware of their impact on your field? *Canada Year Book 1997* and *Canada Year Book 1997 on CD-ROM* place your specialized knowledge in a national context. Clarifying the wider issues affecting the country as a whole, they provide the authoritative background for the application of your unique expertise.

P r e s e n t i n g . . .

... the Book!

- More than 300 tables, charts and graphs presenting the latest socio-economic data
- Detailed index
- Exciting visual presentation of the country through 100 stunning photographs
- 80 fascinating feature articles on distinctive aspects of life in Canada
- Durable hardcover binding

Canada Year Book 1997
(Catalogue No. 11-402-XPE97001)
(plus \$4.⁹⁵ shipping/handling and applicable taxes)

\$54⁹⁵
(in Canada)

... the CD-ROM!

- Windows® and Macintosh™ on the same disc
- Powerful search capacity, index menus, hypertext links
- GBook™ software to exploit *CYB97*'s full potential
- video clips and accompanying audio to enhance the visual experience
- English and French versions on the same disc

Canada Year Book 1997 on CD-ROM
(Catalogue No. 11-402-XCB97001)
(plus \$4.⁹⁵ shipping/handling and applicable taxes)

\$74⁹⁵
(in Canada)

Building for the future on a highly trusted tradition, both the attractive volume and the innovative CD-ROM capture the reality, the vibrancy and the immediacy of the social, economic, demographic and cultural life of Canada. *CYB97* truly is the reference resource on Canada.

In print or on screen, *Canada Year Book 1997* will quickly prove to be an invaluable, much-consulted addition to your library ...at a very reasonable price!

GET Connected

TO STATISTICS CANADA'S ON-LINE CATALOGUE OF PRODUCTS AND SERVICES

Internet users now can link up to **Information on Products and Services (IPS)**, Statistics Canada's newly expanded on-line catalogue. Up-to-date and complete, **IPS** is a fully searchable listing of all current Statistics Canada publications, research papers, electronic products and services. It is the most extensive reference source available on all of Statistics Canada's information assets.

As part of our World Wide Web site, the **IPS** connects users to more than 2,000 entries documenting the full range of Statistics Canada products and services. With **IPS**, you find what you want, when you want it. Whether you're searching for the latest census information, health sector tables or news-breaking economic reports, **IPS** has it listed.

The Statistics Canada Web Site "is full of interesting facts and figures. There is no better place to get the big picture on the Canadian economy."

— David Zgodzinski
The Globe and Mail

Not sure exactly what you're looking for? No problem! **IPS** features a powerful **search tool** that locates thematically related products and services in a matter of seconds. Just type in the word that fits best and the system will point you to the sources where information is available. It's that easy.

YOUR INTERNET ACCESS ROUTE TO STATISTICS CANADA DATA

To start your search, go to "Products and Services" and then click on "Catalogue". Simple on-screen directions will guide you along.

As you will see, **IPS** provides you with key information on Statistics Canada releases: who to contact for customized data retrievals, what you can download either free of charge or at cost, and how you can obtain what you see listed on-screen. **IPS** also highlights time-saving features of the products and services we sell from our nine reference centres across Canada. It's the kind of information you need most when making those important purchase decisions.

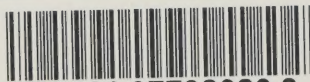

Visit our Web site **TODAY** and discover how easily **IPS** can work for you.
